Arthur Schopenhauer 1788 1860 was a German philosopher best known for his work *The World as Will and Representation*. He responded to and expanded upon Immanuel Kant's philosophy concerning the way in which we experience the world. His critique of Kant, his creative solutions to the problems of human experience and his explication of the limits of human knowledge are among his most important achievements. His metaphysical theory is the foundation of his influential writings on psychology, aesthetics, ethics, and politics, which influenced Friedrich Nietzsche, Wagner, Ludwig Wittgenstein, Sigmund Freud, and others. He said he was influenced by the Upanishads, Immanuel Kant, and Plato. References to Eastern philosophy and religion appear frequently in his writing. He appreciated the teachings of the Buddha and even called himself a Buddhist. He said that his philosophy could not have been conceived before these teachings were available. He called himself a Kantian. He formulated a pessimistic philosophy that gained importance and support after the failure of the German and Austrian revolutions of 1848.

When Schopenhauer was asked where he wished to be buried, he answered, "Anywhere they will find me, and the stone that marks his grave at Frankfurt bears merely the inscription Arthur Schopenhauer without even the date of his birth or death." Schopenhauer, the pessimist, had a sufficiently optimistic conviction that his message to the world would ultimately be listened to, a conviction that never failed him during a lifetime of disappointments, of neglect in quarters where perhaps he would have most cherished appreciation, a conviction that only showed some signs of being justified a few years before his death. Schopenhauer was no opportunist; he was not even conciliatory; he never hesitated to declare his own faith in himself, in his principles, in his philosophy; he did not ask to be listened to as a matter of courtesy but as a right, a right for which he would struggle for which he fought and which has in the course of time it may be admitted been conceded to him. Although everything that Schopenhauer wrote was written more or less as evidence to support his main philosophical thesis, his unifying philosophical principle, the essays in this volume have an interest if not altogether apart at least of a sufficiently independent interest to enable them to be considered on their own merits without relation to his main idea. And in dissociating them, if one may do so for a moment, their author would have scarcely permitted it; one feels that one enters a field of criticism in which opinions can scarcely vary. So far as his philosophy is concerned, this unanimity does not exist; he is one of the best abused amongst philosophers; he has many times been explained and condemned exhaustively, and no doubt this will be as many times repeated. What the trend of his underlying philosophical principal was, his metaphysical explanation of the world is indicated in almost all the following essays, but chiefly in the *Metaphysics of Love* to which the reader may be
