The Internet of things IoT and big data changed customer behavior and how businesses work. This trend has led to a continued increase in complexity for marketing managers. In 2017 8.4 billion devices were connected to the internet. This number is forecasted to increase to 20.4 billion by 2020. The immense amount of data generated, collected, and analyzed has propelled new markets such as big data and artificial intelligence. Marketing managers struggle to keep up with the sheer volume of data available and the surging complexity of marketing. Connecting dispersed data and finding patterns leads to helpful insights which are said to reduce complexity. Many businesses lack a clear strategy to tap into the benefits of AI and gain a competitive advantage. **AI Magazine** ,1997 **Computers and People** ,1984
