Ebook Religious Affects Animality Evolution Power:

Secular Bodies, Affects and Emotions Monique Scheer, Nadia Fadil, Birgitte Schepelern Johansen, 2019-01-10 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Taking its cue from the study of lived religion *Secular Bodies Affects and Emotions* shows how the idea of a secular public is equally marked by a display and cultivation of affect and emotions Whereas it is widely agreed that religion is often saturated by emotion the secular is usually treated as a neutral background serving as the domain of public rational deliberation This book demonstrates that secularity and secularism are also upheld by bodily practices and emotional attachments Drawing on empirical case studies this is the first book to ask and explore whether a secular body exists Building on the work of Talal Asad the book argues that the secular is not an absence of religion but a positive entity that comes about through its co constitutive relationship with religion And once we attune ourselves to recognizing its operations as grammar which structures social practice writing an anthropology of the secular could become a new possibility

Religion in the Anthropocene Celia E. Deane-Drummond, Sigurd Bergmann, Markus Vogt, 2017-03-28 This book charts a new direction in humanities scholarship through serious engagement with the geopolitical concept of the Anthropocene Drawing on religious studies theology social science history and philosophy and can be broadly termed the environmental humanities this collection represents a groundbreaking critical analysis of diverse narratives on the Anthropocene The contributors to this volume recognize that the Anthropocene began as a geological concept the age of the humans but that its implications are much wider than this Will the Anthropocene have good or bad ethical outcomes Does the Anthropocene idea challenge the possibility of a sacred Nature which shores up many religious approaches to environmental ethics Or is the Anthropocene a secularized theological anthropology more properly dealt with through traditional concepts from Catholic social teaching on human ecology Do theological traditions such as Christology reinforce negative aspects of the Anthropocene Not all contributors in this volume agree with the answers to these different questions Readers will be challenged provoked and stimulated by this book

A Plea for Embodied Spirituality Fraser Watts, 2021-04-30 The body is crucial to religious life but there has been little practical attention to how to make a helpful reality of this fact Strong forms of philosophical dualism have been widely abandoned by post war theologians in favour of a more integrated view of human nature but guidance on the role of the body in Christian spirituality remains fragmentary Focusing particularly on drawing out practical implications for religious life and ministry this book will survey the many ways in which the body plays an important role in religions and spiritual life drawing on scientific research theology and philosophy

Where the Spirit Is R. Shea Watts, 2023-03-06 This dissertation explores the experiential contours of Pentecostalism as a liberative praxis The connection between Pentecostalism and social change is a burgeoning line of inquiry particularly in the Global South but this study focuses on the history of Pentecostalism in the US beginning with the production and circulation of the African

American Spirituals Bringing theories of affect into conversation with ritual studies this interdisciplinary work traces personal stories and experiences from the author and examines them in light of Pentecostal traditions that stem from the Azusa Street Revival in Los Angeles California the birthplace of the Pentecostal movement William J Seymour's vision at Azusa was egalitarian and transgressed the societal boundaries and norms of race and gender in the early twentieth century Pentecostalism was and is informed by Black queer female and other voices often silent or rendered invisible Without this representation Pentecostalism is simply one tradition among many co-opted and appropriated for the ongoing colonial projects of the modern Western world Therefore this book explores Blackpentecostal tradition specifically The Fellowship of Affirming Ministries TFAM a predominately Black LGBTQ movement that integrates Pentecostal worship and theology with an inclusive liberative theology *Religion of White Rage* Finley Stephen C. Finley, 2020-09-21 Critically analyses the historical cultural and political dimensions of white religious rage in America past and present This book sheds light on the phenomenon of white rage and maps out the uneasy relationship between white anxiety religious fervour American identity and perceived black racial progress Contributors to the volume examine the sociological construct of the e white labourere whose concerns and beliefs can be understood as religious in foundation and uncover that white religious fervor correlates to notions of perceived white loss and perceived black progress In discussions ranging from the Constitution to the Charlottesville riots to the evangelical community's uncritical support for Trump the authors of this collection argue that it is not economics but religion and race that stand as the primary motivating factors for the rise of white rage and white supremacist sentiment in the United States T&T Clark Companion to the Bible and Film Richard Walsh, 2018-06-28 The first decades of the twenty first century saw a resurgence of the biblical epic film such as Noah and Exodus Gods and Kings which was in turn accompanied by a growth of biblical film criticism This companion surveys that field of study by framing it in light of significant and recent biblical films as well as the voices of key biblical film critics Non Hollywood and seemingly non biblical films also come under investigation The contributors concentrate on three points context focusing on the Bible in specific film genres and cultural situations theory applying theory from both religion and film studies with an eye to their possible intersections and recent and significant texts reflecting on which texts and themes have been most important in biblical film and which are currently at the fore Exploring cinema across the globe and accompanied by extended introductory essays for each of the three sections this companion is an important resource for scholars in both film and biblical reception *Evolution and Religion* William Trumbull, 1917 Evolution and Religion William Trumbull, 1907 *Deeper Than Drawin* John F. Haught, 2005-10-01 In his book God After Darwin Haught argued that religious belief is wholly compatible with evolutionary biology Now he says that while Darwin's vision is essentially correct religious belief is even more revealing about life than Darwinism Looks at the question of how religions may plausibly claim to be bearers of truth not just of meaning While he assumes the fundamental correctness of evolutionary biology he firmly rejects the non

scientific belief that evolutionary biology amounts to an adequate explanation of living phenomena Darwinism is illuminating but it does not tell us everything we need to know about life To find the deepest understandings of life the universe we may still profitably consult the religions of the world

God by Evolution Michael Jarvis,2007-10 Reconciling the Big Bang Universe and evolution with belief in the Creator Our Universe is billions of years old not just thousands Radically new insights relevant to the teaching of Intelligent Design in schools and universities The book is a scientific personal and religious journey towards truth towards a theistic Theory of Everything WARNING This book is not for those who retreat into the darkness of a closed mind whenever faced with facts that seem to conflict with long cherished religious beliefs

The Romance of Evolution, and Its Relation to Religion John Calvin Kimball,1913

Deeper Than Darwin John Haught,2018-05-04 In his acclaimed book *God After Darwin* John Haught argued that religious belief is wholly compatible with evolutionary biology Now in *Deeper Than Darwin* he advances his argument further by saying that religious belief is even more revealing about life than Darwinism Haught looks hard at the question of how after Darwin religions may plausibly claim to be bearers of truth and not just of meaning and adaptive consolation While he assumes the fundamental correctness of evolutionary biology he firmly rejects the non scientific belief that evolutionary biology amounts to an adequate explanation of living phenomena Even though Darwinism is illuminating Haught argues it by no means tells us everything we need to know about life even in principle To find the deepest though certainly not the clearest understandings of life and the universe we may still profitably consult the religions of the world *Deeper Than Darwin* takes up where *God After Darwin* left off arguing that Darwin s vision is important and essentially correct but that we can still dig deeper in our understanding of what is going on in the life story

The Religious Aspect of Evolution James McCosh,1888

God and Evolution? Science Meets Faith Dr. Gerard M. Verschuuren,2012-10-29 Meet the match made in heaven between religion and science as they harmoniously converge through exploring the Catholic view on God and evolution Author Dr Verschuuren a practicing Catholic and human geneticist challenges the black and white attitude toward matters of religion and science Through drawing upon religion philosophy and biology he reveals that science and religion answer different dimensions to the same fundamental question Where do we come from allowing for a compatible and desirable coexistence one that preserves and in fact intensifies God s splendor

Evolution and Religion Arthur J. Dadson,1893

Thank God for Evolution Michael Dowd,2008-06-19 Few issues have revealed deeper divisions in our society than the debate between creationism and evolution between religion and science Yet from the fray Reverend Michael Dowd has emerged as a reconciler finding faith strengthened by the power of reason With evidence from contemporary astrophysics geology biology anthropology and evolutionary psychology *Thank God for Evolution* lays out a compelling argument for how religion and science can be mutually enriching forces in our lives Praised by Nobel laureates in the

scientific community and religious leaders alike Thank God for Evolution will expand the horizon of what is possible for self for relationships and for our world *Evolution and Religion* William Trumbull,2015-06-17 Excerpt from Evolution and Religion A Parent s Talks With His Children Concerning the Moral Side of Evolution In the beginning God created the heaven and the earth And the earth was waste and void and darkness was upon the face of the deep Beyond this simple statement of creative fact human knowledge with all its progress does not go Man s best thought seems to admit that there was a beginning a creation No matter how many countless ages back he may push the date man still appears to believe that the universe as he knows it has not existed from all eternity and will not exist to all eternity But a beginning postulates a cause a creation postulates a creator Had the universe existed unchanged and in its present form from all eternity we might think of it as self existent from and through all time to all eternity Once the idea of a beginning is admitted however we must apparently likewise admit the idea of a cause This cause man calls God Light and Heat And God said Let there be lights in the firmament of heaven Here again human knowledge seems to lend its corroborative evidence The normal conditions of space are apparently darkness and cold About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Emergence of Religion in Human Evolution Margaret Boone Rappaport,Christopher J. Corbally,2019-12-09 Religious capacity is a highly elaborate neurocognitive human trait that has a solid evolutionary foundation This book uses a multidisciplinary approach to describe millions of years of biological innovations that eventually give rise to the modern trait and its varied expression in humanity s many religions The authors present a scientific model and a central thesis that the brain organs networks and capacities that allowed humans to survive physically also gave our species the ability to create theologies find sustenance in religious practice and use religion to support the social group Yet the trait of religious capacity remains non obligatory like reading and mathematics The individual can choose not to use it The approach relies on research findings in nine disciplines including the work of countless neuroscientists paleoneurologists archaeologists cognitive scientists and psychologists This is a cutting edge examination of the evolutionary origins of humanity s interaction with the supernatural It will be of keen interest to academics working in Religious Studies Neuroscience Cognitive Science Anthropology Evolutionary Biology and Psychology
