this time a sizeable community of educational developers has emerged whose work and research focuses on the enhancement of the student experience in higher education. A significant issue for these developers is how change can be effected in organisations with well established academic cultures and practices beset by many other priorities and pressures. This first book length analysis of developers as a community of practice illustrates in their own words the issues they face their differing orientations to development given their differing organisational cultures and how they see their institutional role. What emerges is the contested notion of development itself and a tribe of developers who though fragmented offer a rich variation in their discourse identity and practice. Drawing upon developers own voices the book offers a lively and accessible narrative approach to this rapidly evolving area. It is a useful guide to help individual developers compare their own practice with that of others and development teams to map the effectiveness of their own centre s provision. Educational Development is essential reading for educational developers teaching and learning co ordinators and teaching fellows as well as senior managers with remits for academic development and directors of quality assurance. It is also of interest to those in higher education who are concerned with bringing about organisational or cultural change.

EBOOK: Sustaining Change in Universities Burton Clark, 2004-09-16. What can be done to ensure universities are well positioned to meet the challenges of the fast moving world of the 21st century. This is the central question addressed by Burton R Clark in this significant new volume which greatly extends the case studies and concepts presented in his 1998 book *Creating Entrepreneurial Universities*. The new volume draws on case studies of fourteen proactive institutions in the UK, Europe, Australia, Latin America, Africa and the United States that extend analysis into the early years of the twenty first century. The cumulative international coverage underpins a more fully developed conceptual framework offering insight into ways of initiating and sustaining change in universities. This new conceptual framework shifts attention from transformation to sustainability rooted in a constructed steady state of change and a collegial approach to entrepreneurialism. It contains key elements necessary for universities to adapt successfully to the modern world. Lessons for reform can be drawn directly from both the individual case studies and the general framework. Overall the book offers a new form of university organization that is more self reliant and manages to combine change with continuity, traditional academic values with new managerial values. Essential reading for university administrators, faculty members, students and researchers analysing higher education and educational policymakers worldwide, this book advocates a highly proactive approach to university change and specifies a new basis for university self reliance. Burton R Clark is Allan M. Cartter Professor Emeritus of Higher Education and Sociology at the University of California, Los Angeles. During his career he has taught at five leading US universities: Stanford, Harvard, Berkeley, Yale and UCLA. He has published widely on the nature of university organization and the realistic possibilities of reform, linking research for understanding with research for use.
