Resiliency Bonnie Benard, 2004 A few years ago resiliency theory was relatively new to the fields of prevention and education Today it is at the heart of hundreds of school and community programs that recognize in all young people the capacity to lead healthy successful lives The key as Benard reports in this synthesis of a decade and more of resiliency research is the role that

families schools and communities play in supporting and not undermining this biological drive for normal human development Of special interest is the evidence that resiliency prevails in most cases by far even in extreme situations such as those caused by poverty troubled families and violent neighborhoods An understanding of this developmental wisdom and the supporting research Benard argues must be integrated into adults vision for the youth they work with and communicated to young people themselves Benard s analysis of how best to incorporate research findings to support young people is both realistic and inspirational It is an easy to read discussion of what the research has found along with descriptions of what application of the research looks like in our most successful efforts to support young people

Educational

Resilience in Inner-city America Margaret C. Wang, Edmund W. Gordon, 1994 The story of life in inner city America and the education of its people is often recounted as a tragedy the ending is often predictable and usually dire highlighting deficiency failure and negative trends As with most social problems children and youth in the inner cities are hit hardest But this dismal view is only half of the full picture The cities of our nation are a startling juxtaposition between the despairing and the hopeful between disorganization and restorative potential Alongside the poverty and unemployment the street fights and drug deals are a wealth of cultural economic educational and social resources Often ignored are the resilience and the ability for adaptation which help many who are seemingly confined by circumstance to struggle and succeed in the face of the odds This book helps to broaden the utilization of ways to magnify the circumstances known to enhance development and education so that the burden of adversity is reduced and opportunities are advanced for all children and youth especially the

children and youth of the inner cities who are in at risk circumstances The focus is on raising consciousness about the opportunities available to foster resilience among children families and communities and synthesizing the knowledge base that is central to implementing improvements which serve to better the circumstances and educational opportunities of children and families This volume is intended for a wide audience of readers but particularly those who are in a position to shape public policy and deliver educational and human services

Resilience Among At-risk Children of Poverty Lisa Sue Houston, Joint Doctoral Program in Educational Leadership, 2009 One area of research that has significant implications for improving the education of students at risk of academic failure is concerned with resilient students or those students who succeed despite the presence of adversity This study focuses on why some people overcome adversity and succeed despite the odds The study identifies the context and factors involved for 15 adult subjects who grew up as at risk children in poverty and who now are successful educators Using qualitative in depth semi structured oral history interviews this study includes voices of educators who have many of the social indicators associated with failure but who have defied the negative predictors for success and have obtained college degrees Examining why some students are successful in school while others from the same economically disadvantaged communities are not could be useful in helping educators design more effective educational interventions Intervening conditions was examined to begin to understand protective factors in overcoming adversity External factors such motivational support from family community peer groups and school was highly valued for promoting successful adjustment Internal attributes such as self efficacy and perseverance surfaced in the content analysis A future recommendation is to uncover grounded theoretical explanations of factors that impact nonresilient children of whom little is known
