# Ecological Footprints An Essential Franciscan Guide For Faith And Sustainable Living

**Andrea Cohen-Kiener**

## **Ecological Footprints An Essential Franciscan Guide For Faith And Sustainable Living:**

**Ecological Footprints** Dawn M. Nothwehr, 2012-11-01 The Franciscan Vision offers a powerful antidote to the moral malaise that prevents ordinary Christians from making the necessary choices to live more simply and share the world's goods more equitably This is the driving conviction behind Ecological Footprints Dawn M Nothwehr unfolds the theological spiritual and ethical treasure trove of Christianity especially as it has been developed and lived in Franciscan theology and tradition as it relates to our efforts to achieve sustainable living She succeeds admirably in presenting it all in a style that makes this book both accessible and compelling to no specialist readers

Coming Home to Earth Mark S. Bocker, 2016-09-13 As a young Norwegian Lutheran teenager in rural Wisconsin Bocker lay awake one night worrying whether he believed in Jesus enough to get to heaven This getting to heaven anxiety reflected an excessive focus on individual salvation and a loss of concern for the well being of the Earth community A faith journey that leaves Earth behind is misguided Ever since those early teen years Bocker has been on a journey to come home to Earth Coming Home to Earth makes the case that there is no salvation apart from Earth and that Earth care is at the core of our identity and mission as followers of Jesus The ecological consequences of a loss of concern for the well being of Earth have been devastating Bocker is especially concerned to determine what will motivate followers of Jesus to make radical changes in our way of life so that we can participate in the healing of wounded Earth and all of its inhabitants both human and nonhuman We are far more likely to make needed sacrifices for our fellow creatures if we share God's delight in and affection for them and cherish Earth as our home

*Seeing Differently* Br Samuel ssf, Br Nicolas Alan ssf, Simon Cocksedge, 2021-01-30 This timely book brings together the stories of St Francis his preaching to birds rejection of wealth caring for lepers befriending animals and living simply his poetry and hymnody in praise of creation that is still sung today and the influential writings and examples of inspiring Franciscans who have followed him such as Clare Bonaventure Duns Scotus and Angela of Foligno and draws them into conversation with contemporary concerns for our planet It gathers 800 years of accumulated wisdom and practical examples of how Franciscans have found ways to live at home and at peace with creation It explores that long tradition and experience to ask what lessons can be drawn for today to challenge and enable readers to re visit their own relationship with creation

**Inspired Sustainability** Lothes Biviano, Erin, 2016-04-13

**Facing Climate Collapse** Luis Martínez Andrade, Seforosa Carroll, 2025-05-30 Offering an in depth exploration of the intricate interplay between theology ecology and social justice Facing Climate Collapse critically engages with the evolving discourse surrounding the Anthropocene and presents a compelling argument for rebranding this epoch as the capitalocene Collectively offering a rigorous examination of diverse theological perspectives including ecofeminist antiwar theology and a reimagining of salvation in the context of climate change the chapters in this book present perspectives on ecological justice indigenous wisdom and congregational ecclesiology in Southern Africa With contributions from various academic voices including many from the Global South this

volume invites readers to engage with innovative concepts challenge established paradigms and explore fresh approaches to the pressing ecological issues of our era This book is part of a new series of volumes co published with the World Council of Mission s DARE Discernment And Radical Engagement programme      **All God's Creatures** Daniel P. Horan,2020-07-07 The predominant stewardship model of creation is the result of an intentional effort to correct approaches that reinforce human sovereignty and the resulting environmental degradation However as All God s Creatures argues the stewardship model actually does not offer a correction but rather reinscribes many of the very same pitfalls After close analysis of the stewardship model this book identifies scriptural theological and philosophical sources to support the adoption of a community of creation paradigm Drawing on postcolonial theory this book proposes the concept of planetarity as a framework for conceiving the relationship between human and nonhuman creation and the Creator in a new way This theoretical framework is grounded by a retrieval of the medieval Franciscan theological and philosophical tradition The result is what can be called a postcolonial Franciscan theology of creation imagined in terms of planetarity providing a constructive and nonanthropocentric response to the need for a new conceptualization of the doctrine of creation      Mission on the Road to Emmaus Cathy Ross ,Stephen B. Bevans ,2015-09-30 The contributors in this collection of essays consider mission through the lens of prophetic dialogue They attempt to bring a fresh approach introducing some newer themes and bringing a different perspective on some older themes by examining in a theological rather than issues based way Aimed at scholars and students of missiology in the UK the US and worldwide it is also a contribution to the study of world Christianity and contextual theology      **Franciscan Writings** Dawn M. Nothwehr, OSF,2023-05-18 This book explains key Franciscan values and a hope filled vision of peace justice and sustainability for all of creation Dawn M Nothwehr engages with a wide variety of topics such as ecological sin environmental destruction a positive Franciscan soteriological path forward practical tools necessary for conversion planet healing actions and life sustaining changes Part 1 includes two chapters on the Old and New Testament texts frequently utilized by St Francis and St Clare that uphold values essential for Franciscan ecotheology Part 2 features a chapter on St Francis and one on St Clare mapping the distinct major landmarks of their vernacular theologies on creation care The two chapters of Part 3 first outline the formal Franciscan theology and spirituality of St Bonaventure of Bagnoregio before diving into the Christology and ethics of Blessed John Duns Scotus In four chapters Part 4 focuses on major ecological issues with an interdisciplinary approach considering current science Franciscan theology ethics spirituality and praxis Designed for classroom use each chapter includes a wide variety of pedagogical features primary texts reflection and application questions for reflection and discussion suggestions for action a short prayer and suggestions for further study      **Walking God's Earth** David M. Cloutier,2014 How does the Catholic tradition understand the significance of the environment and what are the implications for our daily lives In Walking God s Earth David Cloutier provides a concise accessible and spiritually engaging introduction to these questions Cloutier emphasizes the importance of finding our place

within God's created order showing how spiritual experiences and scriptural narratives guide us to a humble and realistic perspective one that often clashes with the presumptions of society In its focus on practical ways of living out this message the book identifies key areas food fuel dwelling places work and leisure where Catholics can bring their faith convictions into daily living We are called to handle the things of God's creation in holy sacramental ways as an essential part of our vocation to live out our faith Walking God's Earth emphasizes the importance of connecting both spiritually and morally our environmental lives with the basics of our faith in hope that God's desire for the renewal of the earth may be realized in our own desires and in the practices of our communities

*Care for Creation* Ilia Delio, Keith Douglass Warner, Pamela Wood, 2020-03-04 If we are blowing our Franciscan horn here it should have been blown

much earlier and much louder This is the wisdom that our world so desires and needs today We can no longer see ourselves as separate from the great chain of being and we can no longer see this as a non religious issue Francis intuited all of this 800 years ago Father Richard Rohr O F M Center for Action and Contemplation Albuquerque New Mexico Three of the greatest minds in Franciscan theology Ilia Delio O S F Franciscan Keith Douglass Warner O F M and Pamela Wood come together to discuss one of the greatest crises of our time the destruction of the Earth This book takes both a theological and practical approach to developing a Franciscan spirituality of the earth Four sections highlight the distinct relationships creation has with the world incarnation community contemplation and conversion In this meticulously researched book the authors propose ways in which we can all understand our own roles in relationship to the Earth and ways in which we can make it better Each section offers reflective action opportunities designed to bring the book s ecological and theological insights into the reader s daily life and nurture a Franciscan spirituality of the earth Prayers meditations spiritual practices and group activities are offered which provide a practical hands on approach to reconnecting with the earth and acting in right relationship Earth with all its creatures is in crisis And responding to this crisis will require every possible resource of our human community One of the most precious of these resources is the Franciscan tradition It is a joy to welcome this book as a wise thoughtful inspiring and practical contribution to ecological theology grounded in ancient Christian tradition that sees Earth as our sister and mother Care for Creation is part of a wider retrieval of Franciscan theology for our new time but is unique in this blend of three interrelated disciplines scientifically informed ecology theology and the practice of reflective action From the Foreword by Denis Edwards     *Living within a Fair Share Ecological Footprint* Robert Vale, Brenda Vale, 2013-09-02 According to many authorities the impact of humanity on the earth is already overshooting the earth s capacity to supply humanity s needs This is an unsustainable position This book does not focus on the problem but on the solution by showing what it is like to live within a fair earth share ecological footprint The authors describe numerical methods used to calculate this concentrating on low or no cost behaviour change rather than on potentially expensive technological innovation They show what people need to do now in regions where their current lifestyle means they are living beyond their ecological means such as in Europe North America and Australasia The calculations focus on outcomes rather than on detailed discussion of the methods used The main objective is to show that living with a reduced ecological footprint is both possible and not so very different from the way most people currently live in the west The book clearly demonstrates that change in behaviour now will avoid some very challenging problems in the future The emphasis is on workable practical and sustainable solutions based on quantified research rather than on generalities about overall problems facing humanity

**The Earth Cries Out** Gardner, Gary ,2021-06-16 The Earth Cries Out describes best practices in religious responses to the impending climate and sustainability emergency and presents the next steps for faith communities in the years ahead
