Corporate Citizen Oonagh E. Fitzgerald, 2020-10-06 The contributors to Corporate Citizen explore the legal frameworks and standards of conduct for multinational corporations In a globalized world governed by domestic and international law these corporations can be everywhere and nowhere at once reaping financial benefits and enjoying the protections of investor state arbitration but rarely being held accountable for the economic environmental and human rights harms they may have caused Given the far reaching power and success of the transnational corporation and the many legal tools allowing these companies to avoid liability how can governments protect their citizens Broad ranging in perspective colourful and thought provoking the chapters in Corporate Citizen make the case that because the success of corporate global citizenship risks undermining national and international democratic governance the multinational corporation must be more closely scrutinized and controlled in the service of humanity and the protection of the natural environment

Towards an Integrated Paradigm in Heterodox Economics J. Gerber,R. Steppacher,2011-12-12 The human imprint on the biosphere has become so pronounced in recent years that there has been talk of a new geological era the Anthropocene Gathering contributions from some of the world s foremost heterodox economists this book explores the new economic directions and paradigms that are required to respond to this crisis Foundations of social ecological economics Clive L Spash,2024-03-05 This book explores radical dissent from orthodox mainstream economics and sets out a theoretically grounded vision for the emerging paradigm of social ecological economics At the heart of this paradigmatic shift lies an acknowledgement of the inextricable embeddedness of economies in biophysical reality and social structure The struggle for this transformative vision unfolds through a critical examination of mainstream environmental thought followed by a nuanced evaluation of contributions from Marxists socialists critical institutionalists feminists and Post Keynesians grappling with the urgent environmental crisis Synthesising insights from these diverse and heterodox schools the book navigates the philosophical underpinnings of science embracing a critical realist approach that challenges not only mainstream economic thought but also eclectic pluralism relativism and strong constructionism The question of what constitutes revolutionary science is explored in light of works by Kuhn Schumpeter and Neurath emphasising the pivotal role of values and ideology in works from Marx to Gramsci Building on these radical and philosophical foundations the book articulates a preanalytic vision of social ecological economics dismantling entrenched notions of growth and efficiency in favour of a framework centered on social provisioning and needs embedded in ethics In a thought provoking conclusion the book applies its analytical lens to the multiple crises of modernity within industrialised capital accumulating economies An agenda for social ecological transformation toward diverse alternative economies emerges providing a compelling call to action in the face of contemporary challenges
