**Economic Development and Transition** Justin Yifu Lin, 2009-02-12 In Economic Development and Transition renowned development economist Justin Yifu Lin argues that economic performance in developing countries depends largely on government strategy. If the government plays a facilitating role enabling firms to exploit the economy's comparative advantages, its economy will develop successfully. However, governments in most developing countries attempt to promote industries that go against their comparative advantages by creating various kinds of distortion to protect nonviable firms in priority industries. Failing to recognize the original intention of many distortions, most governments in transition economies attempt to eliminate those distortions without addressing firms' viability problems, causing economic performance to deteriorate in their transition process. Governments in successful transition economies adopt a pragmatic dual-track approach that encourages firms to enter sectors that were suppressed previously and gives necessary support to firms in priority industries before their viability issue is addressed.

*How China's Silk Road Initiative is Changing the Global Economic Landscape* Yuan Li, Markus Taube, 2019-08-28 China's New Silk Road initiative constitutes one of the most ambitious projects in recent decades, designed to change the pattern of the global economic division of labour as well as the geostrategic balance of power. It has the potential to create a new fabric of industrial value creation that links China and East Asia via Central and South Asia with Europe and to forge new regional and multilateral institutions that complement or compete with existing regional and global governance systems. First proposed in 2013, the new initiative is only now starting to be rolled out, with trade relations gradually intensifying and the first investment projects and infrastructure clusters becoming manifest. However, the full impact of the evolving new regional value chains on global goods flows, investment activity, supra-national institution building, as well as their wider international implications, remains undetermined. This book brings together leading scholars from economics, political science, and area studies who present the latest cutting-edge knowledge and the latest state of the art economic and political analysis on how the new initiative is developing and likely to develop.

**New Structural Economics** Justin Yifu Lin, 2012-01-01 This book provides an innovative framework to analyze the process of industrial upgrading and diversification, a key feature of economic development. Based on this framework, it provides concrete advice to development practitioners and policy makers on how to unleash a country's growth potential.

Africa and Economics Célestin Monga,Justin Yifu Lin,2015-07-02 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments While intellectually charming and often elegantly formulated that conventional wisdom is actually contradicted by historical evidence and common sense It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure In fact the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological low income countries are by definition those where such ingredients are missing None of today's high income countries started its growth process with the required and complete list of growth ingredients Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism the conventional view must be re examined debated and questioned This volume the second of the Oxford Handbook of Africa and Economics reassesses the economic policies and practices observed across the continent since independence It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book **Advances in Economics and Econometrics: Volume 2, Applied Economics** Daron

Acemoglu,Manuel Arellano,Eddie Dekel,2013-05-13 This is the second of three volumes containing edited versions of papers and commentaries presented at invited symposium sessions of the Tenth World Congress of the Econometric Society held in Shanghai in August 2010 The papers summarize and interpret key developments in economics and econometrics and they discuss future directions for a wide variety of topics covering both theory and application Written by the leading specialists in their fields these volumes provide a unique accessible survey of progress on the discipline The first volume primarily
