Automation and Its Macroeconomic Consequences Klaus Prettnner, David E. Bloom, 2020-06-19 *Automation and Its Macroeconomic Consequences* reveals new ways to understand the economic characteristics of our increasing dependence on machines. Illuminating technical and social elements, it describes economic policies that could counteract negative income distribution consequences of automation without hampering the adoption of new technologies. Arguing that modern automation cannot be compared to the Industrial Revolution, it considers consequences of automation such as spatial patterns, urbanization, and regional concerns. In touching upon labor, growth, demographic, and policy, *Automation and Its Macroeconomic Consequences* stands at the intersection of technology and economics, offering a comprehensive portrait illustrated by empirical observations and examples. Introduces formal growth models that include automation and the empirical specifications on which the data-driven results rely. Focuses on formal modeling, empirical analysis, and derivation of evidence-based policy conclusions. Considers consequences of automation such as spatial patterns, urbanization, and regional concerns.

Handbook of Research on Educational Technology Integration and Active Learning Keengwe, Jared, 2015-05-31 As today's teachers prepare to instruct a new generation of students, the question is no longer whether technology should be integrated into the classroom but only how. Forced to combat shorter attention spans and an excess of stimuli, teachers sometimes see technology as a threat rather than a potential enhancement to traditional teaching methods. The *Handbook of Research on Educational Technology Integration and Active Learning* explores the need for new professional development opportunities for teachers and educators as they utilize emerging technologies to enhance the learning experience. Highlighting the advancements of ubiquitous computing, authentic learning, and student-centered instruction, this book is an essential reference source for educators, academics, students, researchers, and librarians.

Economic Growth David N. Weil, 2009 Why are some countries rich and others poor? David N. Weil, one of the top researchers in economic growth, introduces students to the latest theoretical tools, data, and insights underlying this pivotal question. By showing how empirical data relate to new and old theoretical ideas, *Economic Growth* provides students with a complete introduction to the discipline and the latest research. With its comprehensive and flexible organization, *Economic Growth* is ideal for a wide array of courses, including undergraduate and graduate courses in economic growth, economic development, macro theory, applied econometrics, and development studies. Sala-i-Martin, 2003-10-10 The long-awaited second edition of an important textbook on economic growth, a major revision incorporating the most recent work on the subject. This graduate-level text on economic growth surveys neoclassical and more recent growth theories, stressing their empirical implications and the relation of theory to data and evidence. The authors have undertaken a major revision for the long-awaited second edition of this widely used text, the first modern textbook devoted to growth theory. The book has been

expanded in many areas and incorporates the latest research After an introductory discussion of economic growth the book examines neoclassical growth theories from Solow Swan in the 1950s and Cass Koopmans in the 1960s to more recent refinements this is followed by a discussion of extensions to the model with expanded treatment in this edition of heterogeneity of households The book then turns to endogenous growth theory discussing among other topics models of endogenous technological progress with an expanded discussion in this edition of the role of outside competition in the growth process technological diffusion and an endogenous determination of labor supply and population The authors then explain the essentials of growth accounting and apply this framework to endogenous growth models The final chapters cover empirical analysis of regions and empirical evidence on economic growth for a broad panel of countries from 1960 to 2000 The updated treatment of cross country growth regressions for this edition uses the new Summers Heston data set on world income distribution compiled through 2000

Economic Growth and Development Sibabrata Das, Alex Mourmouras, Peter Rangazas, 2018-08-16 This text is an introduction to the newer features of growth theory that are particularly useful in examining the issues of economic development Growth theory provides a rich and versatile analytical framework through which fundamental questions about economic development can be examined Structural transformation in which developing countries transition from traditional production in largely rural areas to modern production in largely urban areas is an important causal force in creating early economic growth and as such is made central in this approach Towards this end the authors augment the Solow model to include endogenous theories of saving fertility human capital institutional arrangements and policy formation creating a

single two sector model of structural transformation Based on applied research and practical experiences in macroeconomic development the model in this book presents a more rigorous quantifiable and explicitly dynamic dual economy approach to development Common microeconomic foundations and notation are used throughout with each chapter building on the previous material in a continuous flow Revised and updated to include more exercises for guided self study as well as a technical appendix covering required mathematical topics beyond calculus the second edition is appropriate for both upper undergraduate and graduate students studying development economics and macroeconomics **Economic Growth** Olivier de La Grandville,2017 The second edition of this user friendly book provides a clear and original introduction to the theory of economic growth The book has been fully updated to incorporate several important new results and proofs and offers a new solution to the fundamental question how much should a nation save and invest *Growth and Distribution: Second Edition* Duncan K. Foley,2019 *Economic Growth and Development* Hendrik Van den Berg,2012 This textbook covers the full range of topics and issues normally included in a course on economic growth and development Both mainstream economic perspectives as well as the multi paradigmatic inter disciplinary and dynamic evolutionary perspectives from heterodox economics are detailed Economic development is viewed in terms of the long run well being of humanity social stability environmental sustainability and just distribution of economic gains not simply as the growth of GDP Furthermore this textbook explicitly recognizes the complexity of economic development by linking economic activity to our broader social and natural environments The textbook s unique feature is its focus on the natural environment Both the historical effects of economic development on the environment and the environmental constraints on future economic development are thoroughly discussed in two chapters on environmental issues and policies In fact because economic development is defined in terms of economic social and environmental sustainability the natural environment is included in discussions throughout the book The textbook is inter disciplinary knowledge from fields such as sociology psychology political science economic history and ecology is called on to enhance the economic analysis A thorough historical account of the development of the principal paradigms of economic development is also included and the important issues of institutional development and cultural change merit their own chapters Two chapters on technological change holistically focus on production technologies as well as the dynamic performance of entire economic social and ecological systems Also the important relationship between economic development and globalization is presented in three chapters on international trade international finance and investment and immigration from both orthodox and heterodox perspectives *Economic Growth* Weil,2004-08-10

Introduction To Economic Growth 2Nd/Ed Charles Irving Jones,2006-01-01 Designed for advanced undergraduates this text discusses economic growth how economists have come to understand the growth of countries how the poor are poor and how fast rich and poor countries grow **Economic Growth And Development (Second Edition)** Hendrik Van Den Berg,2012-03-30 This textbook covers the full range of topics and issues normally included in a course on economic growth

and development Both mainstream economic perspectives as well as the multi paradigmatic inter disciplinary and dynamic evolutionary perspectives from heterodox economics are detailed Economic development is viewed in terms of the long run well being of humanity social stability environmental sustainability and just distribution of economic gains not simply as the growth of GDP Furthermore this textbook explicitly recognizes the complexity of economic development by linking economic activity to our broader social and natural environments The textbook s unique feature is its focus on the natural environment Both the historical effects of economic development on the environment and the environmental constraints on future economic development are thoroughly discussed in two chapters on environmental issues and policies In fact because economic development is defined in terms of economic social and environmental sustainability the natural environment is included in discussions throughout the book The textbook is inter disciplinary knowledge from fields such as sociology psychology political science economic history and ecology is called on to enhance the economic analysis A thorough historical account of the development of the principal paradigms of economic development is also included and the important issues of institutional development and cultural change merit their own chapters Two chapters on technological change holistically focus on production technologies as well as the dynamic performance of entire economic social and ecological systems Also the important relationship between economic development and globalization is presented in three chapters on international trade international finance and investment and immigration from both orthodox and heterodox perspectives
