

THE ULTIMATE PRODUCT MANAGEMENT FRAMEWORK

Product management is the practice of developing, marketing, and continuously improving a company's product or products. The idea of product management first appeared in the early 20s as written by the president of Procter & Gamble, where he introduced the idea of manager – a "brand man" completely responsible and instrumental to its growth. Decades later, in the 1980s, modern product management started to shape with the explosive growth of the software. Since then, product management has become connected to and typically found in computer software.
