Economic Analysis and Efficiency in Policing, Criminal Justice and Crime Reduction Matthew Manning, Shane D. Johnson, Nick Tilley, Gabriel T.W. Wong, Margarita Vorsina, 2016-09-23 This monograph explains what economic analysis is why it is important and forms it can take in policing and criminal justice Costs are important in all forms of economic analysis but their collection tends to be partial and inadequate in capturing key information A practical guide to the collection is therefore also provided *Routledge Handbook of Crime Science* Richard Wortley, Aiden Sidebottom, Nick Tilley, Gloria Laycock, 2018-11-13 Crime science is precisely what it says it is the application of science to the phenomenon of crime This handbook intended as a crime science manifesto showcases the scope of the crime science field and provides the reader with an understanding of the assumptions aspirations and methods of crime science as well as the variety of topics that fall within its purview Crime science provides a distinctive approach to understanding and dealing with crime one that is outcome oriented evidence based and that crosses boundaries between disciplines The central mission of crime science is to find new ways to cut crime and increase security Beginning by setting out the case for crime science the editors examine the roots of crime science in environmental criminology and describe its key features The book is then divided into two sections The first section comprises chapters by disciplinary specialists about the contributions their sciences can make or have already made to crime science Chapter 12 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Document**

Retrieval Index, 1974 **The Cambridge Handbook of Privatization** Avihay Dorfman, Alon Harel, 2021-09-16 Some goods and services seem to be fundamentally public such as legislation criminal punishment and fighting wars By contrast other functions such as garbage collection do not This volume brings together prominent scholars from a range of academic fields including law economics philosophy and sociology to address the core question of what makes a certain good or service fundamentally public and why Sometimes governments and other public entities are superior because they are more likely to get at the right decisions or follow fair procedures In other instances the provision of goods and services by public entities is intrinsically valuable By analyzing these answers the authors also explore the nature of the state and its authority This handbook explores influential arguments for and against privatization and also develops a number of key studies explaining justifying or challenging the legitimacy and the desirability of public provision of particular goods and services **Crime and Economics** Kevin Albertson, Chris Fox, 2011-10-05 Crime and Economics provides the first comprehensive and accessible text to address the economics of crime within the study of crime and criminology The economics of crime is an area of growing activity and concern increasingly influential both to the study of crime and criminal justice and to the formulation of crime reduction and criminal justice policy As well as providing an overview of the relationship between economics and crime this book poses key questions such as What is the impact of the labour market and poverty on crime

Can society decrease criminal activity from a basis of economic disincentives What forms of crime reduction and methods of reducing re offending are most cost beneficial Can illicit organised crime and illicit drug markets be understood better through the application of economic analysis For those interested in economic methods but without previous economic training this book also provides an accessible overview of key areas such as cost benefit analysis econometrics and the debate around how to estimate the costs of crime This book will be key reading for undergraduate and postgraduate students of criminology and economics and those working in the criminal justice system including practitioners managers and policy makers

The Economics of Crime Control Llad Phillips, Harold L. Votey, 1981-11 This book is about how public funds and human resources can be allocated to optimize the control of crime in a modern democratic society The authors build a model of crime generation and control through the imposition of sanctions that provides insight into alternatives for social policy makers Econometric techniques are used to analyze policy issues such as establishing control policies determining monetary measures of the seriousness of crime discerning community priorities for fighting crime choosing between alternative drug control programs and extracting useful information from crime data These techniques are also used to determine the effect of economic opportunities for youth on crime rates the influence of rising crime rates on police effectiveness the cost of police effectiveness and the possibility for deterring violence Additional issues examined are the effect of handgun control on homicide rates the relative merits of jail and probation the rate of police manpower growth needed to keep pace with crime rates and the necessary data needed for planning an optimum level of public safety The analysis starts with single equation estimations and builds to system and multi equation models The statistical results are based on several data sets with the earlier studies using time series from the 1950 s and 1960 s The estimation of the more complex model is based on cross sectional data from the 1960 and 1970 census for the counties of California
