Quality Management in Archaeology W. J. H. Willems, Monique Henriëtte van den Dries, 2007 Quality Management in Archaeology deals with the effects of the profound changes that have had an impact on the discipline of archaeology all over the world In North America in Europe and increasingly in other parts of the world new legislation and international treaties have changed its position in society What was once a university based research activity by a limited number of academics has become a socially relevant field with many practitioners that are mostly employed in some branch of archaeological resource management Archaeology has been successful in persuading governments and the general public that more should be done to preserve archaeological heritage and to investigate it where it will be irretrievably lost The scale and frequency of

archaeological work has increased vastly at considerable cost to society. Consequently there is pressure to do the work efficiently and economically. At the same time academic standards have to be maintained to assure that the end result will be the relevant knowledge about the past that society pays for. Different countries have found different approaches and solutions to deal with this dilemma. Sometimes commercial archaeology is allowed, sometimes it is not, but in every national context quality has to be managed in some way. This book presents a survey by specialists from the US, Canada, and several European countries on how this is done, what the principles are, and also the priorities. It will be useful for anyone interested in archaeological resource management. *Perspectives on Archaeological Resources Management in the "Great Plains"* Alan J. Osborn, Robert C. Hassler, 1987. 21st Century Homestead: Sustainable Agriculture I Marlon Henkel, 2015-02-22. 21st Century Homestead Sustainable Agriculture I contains the first part of everything you need to stay up to date on sustainable agriculture. **Cultural Resource Management in Contemporary Society** Alf Hatton, Francis P.

MacManamon, 2003-05-20. This innovative collection of essays from an international range of contributors describes various means of preserving, protecting, and presenting vital cultural resources within the context of economic development, competing claims of ownership of particular cultural resources, modern uses of structures and space, and other aspects of late twentieth century life. *The Public Historian*, 2007. **Journal of California and Great Basin Anthropology**, 2006.

Archaeology Brian M. Fagan, 2009. Archaeology: A Brief Introduction, 10th edition, is an introduction to the fundamental principles of method and theory in archaeology while exposing students to archaeology as a career. The text begins by covering the goals of archaeology, going on to consider the basic concepts of culture, time, and space, and discussing the finding and excavation of archaeological sites. The author provides a distinct emphasis on the ethics behind archaeology and how we should act as stewards of the finite records of the human past. Archaeology 10e is a book with a truly international perspective, not simply focusing on North America or Europe. This brief book is ideal for the introductory archaeology classroom as it is designed for complete beginners, keeping technical jargon to a minimum without sacrificing scholarship.
