

DOING RIGHT

A Practical Guide to Ethics for Medical Trainees and Physicians

PHILIP C. HÉBERT

Doing Right Philip Hebert

Michael Hillier

Doing Right Philip Hebert:

Doing Right Philip C. Hébert, 1996 Traditionally the knowledge needed by physicians has consisted largely of medical science But in recent years ethical questions have been looming ever larger in everyday clinical practice *Doing Right* is a practical guide to decision making in those situations Using dozens of real cases it analyzes the most common ethical problems encountered by physicians and medical trainees The many topics covered include truth telling refusal of treatment confidentiality rationing of health care parents refusal of treatment for their children living wills the ethics of medical research and assisted suicide Written simply and concisely with little philosophical or legal jargon *Doing Right* should be essential reading for medical students residents and practising physicians For those who teach bioethics it will be welcome as a practical and readable textbook

Doing Right Philip C. Hébert, 2014-04 Aimed at second and third year ethics courses offered out of medical schools health sciences departments and nursing programs *Doing Right A Practical Guide to Ethics for Medical Trainees and Physicians* third edition is a practical guide to analyzing and resolving the ethical dilemmas medical practitioners face on a day to day basis *Good Medicine* Philip Hebert, 2016-04-19 Award winning physician Philip C H bert creates a brave and intimate portrait of the complex ethical imperatives at the heart of good medicine doctors do not have all the answers patients must be heard and their needs desires fears and experiences must be reflected in how practitioners look after them Medical science continues to advance to previously unimagined heights in its diagnostic and treatment capabilities With these advances however come unexpected ethical dilemmas for practitioners patients and families In *Good Medicine* Dr H bert approaches these questions of pressing and fundamental importance from the dual point of view of acclaimed physician and long time patient With remarkable balance and sensitivity he explores a range of politically constitutionally and ethically contentious matters including assisted suicide treatment refusal and suspension and the overall allocation of medical resources H bert pairs his artful analysis with the real life often deeply moving stories of those who have lived these challenges H bert offers piercing and compassionate insight into the relationship between patients and medical professionals and guides readers towards the open and empathetic communication needed to ensure good medicine for everyone

Doing Right Philip Hebert, 2008-11-06 *Doing Right* is a concise and practical guide to ethical decision making in medicine The text is aimed at second and third year one semester ethics courses offered in medical schools health sciences departments and nursing programs **Doing Right** Philip C. Hebert, Wayne Rosen, 2023

Doing Right Philip Charles Hébert, 1996 **Your Guide to Get Into Medical School** Aly Madhavji, Jiayi Hu, Manveen Puri, Sameer Masood, 2016-07-30 It is commonly known that the application process to medical school is competitive From our experience about 1% of students who express an interest in becoming a physician during their first year of undergraduate studies eventually matriculate into medical school While pursuing a career in medicine remains a dream for many and is considered the endpoint of a journey many different paths can lead towards that destination Given the

significant time commitment required for a successful application the decision to pursue medicine is one of the biggest decisions many high school and undergraduate students face However many applicants do not look beyond gaining the coveted admission letter and are then left with an incomplete understanding of what medical school entails and the diverse career paths they can take after obtaining their MD One of the primary reasons for this is that despite significant progress made in recent years medicine remains a closed door career A large proportion of students in our medical class had at least one immediate relative within the profession which is also reflected in the literature The barriers created by such exclusivity make it difficult for those who have not been socialized into the profession from a young age to navigate the unspoken pitfalls of the admissions process This book attempts to break down some of those barriers It focuses on every component of the medical school application process It differs from the many other books written on this subject by taking an experiential approach We believe that the best way to learn about medical school acceptance is to garner advice from those who have recently achieved that milestone as well as from individuals in related professions who can provide valuable insights This guide is divided into ten chapters each of them covering an important step along a premed's journey While this book has a focus on North America we have written this guide with a global audience in mind as many of the concepts discussed are relevant to any medical school application process As such although the key components of the application process to medical school remain the same across various training systems not every chapter will be equally relevant to every reader Typically an application is composed of academic performance volunteer activities research projects medical college admission test performance and extracurricular activities We have combined the prescriptive style of most books of this type with detailed stories of how real people navigated their personal journeys to reach successful outcomes This guide shares a broad range of perspectives on what it takes and means to be a physician We are more convinced than ever that amongst applicants who have the academic credentials those who seek mentors and network early within the profession be it through family or friend circles and those who learn from their mistakes are accepted earlier This book will help you in that journey towards medical school acceptance and an exciting career in medicine Jiayi Hu MD Manveen Puri MD CCFP Sameer Masood MD Aly Madhavji CPA CA CMA CIM **Beasts of Love** Jeanette M. A. Beer, 2003-01-01 In *Le Bestiaire d'amour* and the *Response* a medieval chancellor's erotic bestiary to a woman is countered by the woman's passionate protest against the cleric's misogynistic presuppositions Beer presents a close linear reading of the two literary texts *Just What the Doctor Ordered* Christine Fader, 2018-09-24 Take the inside track to medical school with expert advice from a specialist Getting into medical school in Canada isn't easy you need to stand out among a field of highly motivated and accomplished applicants In fact most applicants aren't successful the first time they apply Christine Fader was an application reviewer and interviewer at a Canadian medical school for eight years and has worked as a career counsellor at Queen's University and in private practice for 20 years After helping thousands of students through the medical school application and interview process she

has a wealth of insight about what helps to elevate an applicant's chances and what doesn't. In *Just What the Doctor Ordered* she shares her secrets including Starting to prepare for future medical school applications while still in high school can set you up for success and needn't be stressful Good grades aren't enough Learn what experience you need and how to describe it to gain an edge Take a smart approach to the MCAT and CASPer by knowing the keys to preparation Make your application shine with examples and tips on the essay and short answer sections Ace your interview with strategies to help you prepare for the types of questions interviewers ask Learn from stories about other applicants just like you Whether you're a high school student laying the groundwork for a career in medicine or a university student working on med school applications now Christine shows you how to maximize your chances of getting accepted to a Canadian medical school Includes help for parents too

Postphenomenological Investigations Rosenberger,,Peter-Paul Verbeek,2015-05-20 Postphenomenological Investigations Essays on Human Technology Relations provides an introduction to the school of thought called postphenomenology and showcases projects at the cutting edge of this perspective Postphenomenology presents a unique blend of insights from the philosophical traditions of phenomenology and American pragmatism and applies them to studies of user relations to technologies These studies provide deep descriptions of the ways technologies transform our abilities augment our experience and shape the world around us This book proceeds with a preface by Don Ihde postphenomenology's founder and a detailed review of the main ideas of this perspective by the editors Robert Rosenberger and Peter Paul Verbeek The body of this volume is composed of twelve postphenomenological essays which reflect the expansive range detail orientation and interdisciplinarity of this school of thought These essays confront a broad assortment of topics both abstract and concrete Abstract topics addressed include metaphysics ethics methodology and analysis of the notions of selfhood skill training speed and political activism Just a few of the concrete topics studied include human like interactive robots ethics education image interpretation in radiology science fiction tropes transportation history wearable computing and organ donation protocols for brain dead bodies The volume concludes with constructive critiques of postphenomenology by Andrew Feenberg Diane Michelfelder and Albert Borgmann all figures whose work is relevant to postphenomenological projects
