The Gest of Robyn Hode: A Critical and Textual Commentary Robert B. Waltz, The Gest is the earliest major writing about Robin Hood although it tells a tale very different from that found in most modern retellings This version attempts to produce a more accurate text of the long lost original it also provides a modernized parallel To this is added an extensive historical introduction line by line commentary vocabulary study and a selection of other texts which clarify the context of the Gest Dedicated to Patricia Rosenberg **Fenland Nature** Duncan Poyser, Simon Stirrup, 2025-05-06 This book showcases the natural history and landscape of the Fens an area now responsible for a third of Britain's food production and worth over 3 billion to the economy every year It describes the geology and geography across the Fenland Basin over the last 14 000 years

a period dominated by the flux of wetlands and movement of water The human relationship with this landscape is traced through history from Mesolithic hunters to the prosperity of a medieval economy based on the currency of eels through the taming and draining of the vast wetlands to modern farming on an industrial scale While recognising that only a fraction of the Fens is left Fenland Nature celebrates the breadth of wildlife still to be found in the region from vast flocks of visiting wildfowl in the winter months to rare and specialised plants and insects all illustrated with detailed and evocative photographs The book concludes by contemplating an uncertain future where there are possibilities for a sustainable agricultural industry alongside increasing biodiversity requiring new ways of thinking and working with the land The fenland landscape is a microcosm of the huge global challenges caused by habitat loss ecological degradation and climate change If solutions can be found to these complex issues in the Fens then there is hope that these can also apply to similar places across the world
