### **The Phenomenon of Obama and the Agenda for Education - 2nd Edition**

Paul R. Carr, Brad J. Porfilio, 2015-02-01 Anyone who is touched by public education teachers administrators teacher educators students parents politicians pundits and citizens ought to read this book a revamped and updated second edition It will speak to educators policymakers and citizens who are concerned about the future of education and its relation to a robust participatory democracy The perspectives offered by a wonderfully diverse collection of contributors provide a glimpse into the complex multilayered factors that shape and are shaped by education institutions today The analyses presented in this text are critical of how globalization and neoliberalism exert increasing levels of control over the public institutions meant to support the common good Readers of this book will be well prepared to participate in the dialogue that will influence the future of public education in United States and beyond a dialogue that must seek the kind of change that represents hope for all students As for the question contained in the title of the book The Phenomenon of Obama and the Agenda for Education Can Hope Still Audaciously Trump Neoliberalism Second Edition Carr and Porfilio develop a framework that integrates the work of the contributors including Christine Sleeter and Dennis Carlson who wrote the original forward and afterword respectively and the updated ones written by Paul Street Peter McLaren and Dennis Carlson which problematize how the Obama administration has presented an extremely constrained conservative notion of change in and through education The rhetoric has not been matched by meaningful tangible transformative proposals policies and programs aimed at transformative change and now fully into a second mandate this second edition of the book is able to more substantively provide a vigorous critique of the contemporary educational and political landscape There are many reasons for this and according to the contributors to this book it is clear that neoliberalism is a major obstacle to stimulating the hope that so many have been hoping for Addressing systemic inequities embedded within neoliberalism Carr and Porfilio argue is key to achieving the hope so brilliantly presented by Obama during the campaign that brought him to the presidency

*What About Us?* Edgar D. Johnson, 2010-12-01 Over the past three decades the standards based reform movement has transformed K 12 education in the United States culminating with passage of the No Child Left Behind Act in 2002 Beyond making reasonable accommodations for special needs students standards based education pays little attention to other areas of student difference relying instead on a rational actor model of student experience and ignoring how differences in students

backgrounds and orientations impact their particular experiences of schooling This book examines the development of standards based education with particular scrutiny of the roles of the National Governors Association and its National Education Summit events Examination of important documents emerging from those events provides an illustration of the conceptually impoverished understanding of student subjectivity motivation and agency inherent in standards based education In order to understand both problems with and alternatives to standards based education the author examines the roles of ideology rhetoric and audience in school policy In three case studies the author analyzes several non school models of education including Marine Corps bootcamp Ving Tsun kung fu training and an online school resistance community Johnson argues that examination of these learning contexts provides a better understanding of the shortcomings and dangers of the standards based model of student subjectivity and suggests a set of fourteen principles to inform the development of more student centered alternatives

**The Real America** Ben J. Wattenberg, 1976      **The Saturday Review of Politics, Literature, Science and Art**, 1878      Rethinking Educational Administration Peter Gronn, 1983 This monograph discusses Thomas Greenfield's writings and those of his two major detractors Daniel Griffiths and Donald J. Willower For nearly a decade Greenfield has attacked traditional theories of educational administration and argued for the centrality of mind in the construction of organizational and administrative reality An introductory essay discloses the mode of reasoning evident in Greenfield's discourse by identifying ways in which disputation reveals a mental universe also evident in the works of Griffiths and Willower In three readings Greenfield expresses doubts about what he sees as the ill conceived nature of educational administration He contends that placing meaning and intention upon experience shapes what we call organizations and that this process should be the focus of organizational theory Griffiths's reactions to Greenfield's doubts are to criticize organizational theories that pertain to educational administration and to offer suggestions that clarify concepts and restrict theories Willower responds by exploring philosophical issues surrounding theory in educational administration questioning its *raison d'être* as a field of academic endeavor Analysis of Greenfield and his critics demonstrates how theorizing in educational administration exposes differences about educational administration Each reading provides a list of references or endnotes an annotated bibliography is included CJH      *In Search of the Real America* Ben J.
