Educational Research Material Culture And Its Representation:

Educational Research: Material Culture and Its Representation Paul Smeyers, Marc Depaepe, 2014-02-10 This collection discusses and illustrates how educational research is affected by the economic institutional and physical contingencies of its time and in our time even increasingly is driven by them It is argued that the antidote to this is however not to aspire to thought itself but instead to do justice to its own rootedness in the material including textuality From an historical point of view such an innovative approach can itself revamp the material scholarly culture and the way it is represented The chapters address a variety of topics such as the cultural heritage of the school desk the significance of images for research into long term educational processes the way iconic signs function and how modes of enquiry relate to the materiality of education Attention is also given to standards for reporting on educational research studies and how these limit the scope and communication and moreover shape researchers to the forms of citation practices as substantially influencing methods and content and to the centrality of conversation not just as the means to an end but as what matters further to representational and to non representational theories for educational research Some examples are drawn from the area of arts based educational research from mathematics education and from the discourse on universities

Handbook of Historical Studies in Education Tanya Fitzgerald, 2020-04-03 This book offers an in depth historiographical and comparative analysis of prominent theoretical and methodological debates in the field Across each of the sections contributors will draw on specific case studies to illustrate the origins debates and tensions in the field and overview new trends directions and developments Each section includes an introduction that provides an overview of the theme and the overall emphasis within the section In addition each section has a concluding chapter that offers a critical and comparative analysis of the national case studies presented As a Handbook the emphasis is on deeper consideration of key issues rather than a more superficial and broader sweep The book offers researchers postgraduate and higher degree students as well as those teaching in this field a definitive text that identifies and debates key historiographical and methodological issues The intent is to encourage comparative historiographical perspectives of the nominated issues that overview the main theoretical and methodological debates and to propose new directions for the field

Appearances Matter Tim Allender, Inés Dussel, Ian Grosvenor, Karin Priem, 2021-09-07 The visual turn recovers new pasts With education as its theme this book seeks to present a body of reflections that questions a certain historicism and renovates historiographical debate about how to conceptualize and use images and artifacts in educational history in the process presenting new themes and methods for researchers Images are interrogated as part of regimes of the visible of a history of visual technologies and visual practices Considering the socio material quality of the image the analysis moves away from the use of images as mere illustrations of written arguments and takes seriously the question of the life and death of artifacts that is their particular historicity Questioning the visual and material evidence in this way means considering how when and in which regime of the visible it
