Ausubel, 2012-12-06 In 1963 an initial attempt was made in my *The Psychology of Meaningful Verbal Learning* to present a cognitive theory of meaningful as opposed to rote verbal learning It was based on the proposition that the acquisition and retention of knowledge particularly of verbal knowledge as for example in school or subject matter learning is the product of an active integrative interactional process between instructional material subject matter and relevant ideas in the learner's cognitive structure to which the new ideas are relatable in particular ways This book is a full scale revision of my 1963 monograph *The Psychology of Meaningful Verbal Learning* in the sense that it addresses the major aforementioned and hitherto unmet goals by providing for an expansion clarification differentiation and sharper focusing of the principal psychological variables and processes involved in meaningful learning and retention i.e. for their interrelationships and interactions leading to the generation of new meanings in the individual learner The preparation of this new monograph was largely necessitated by the virtual collapse of the neobehavioristic theoretical orientation to learning during the previous forty years and by the meteoric rise in the seventies and beyond of constructivist approaches to learning theory Educational Psychology 85/86, 1985 **Cognition, Education, and Deafness** David S.
