Digital Single Market. Eliminating barriers in offering goods and services across EU borders Hilal Jalaludeen,2019-12-19 Master s Thesis from the year 2019 in the subject Economics Foreign Trade Theory Trade Policy grade 1 3 Otto Beisheim

School of Management Vallendar language English abstract The author aims at providing an objective and comprehensive analysis of the selected issues initiatives under consideration with respect to the 30 DSM legislative initiatives addressing 24 issues proposed by the Juncker Commission since presenting the DSM strategy in 2015 The author then goes on to explain the major issues that the Juncker Commission ignored or did not address properly in the 30 DSM legislative initiatives these have been titled flexible working arrangements pros and cons gender digital gap socio cultural and political issues and coherent European strategy for AI The DSM strategy presented by the Juncker Commission in 2015 has been a special topic in the EU Since then the Juncker Commission has been able to come up with a number of significant DSM legislative initiatives to make good on the promise of laying a strong foundation for the creation of a fully fledged DSM in the EU As the Juncker Commission s tenure comes to an end in 2019 it is the right time to reflect on these DSM legislative initiatives and determine its success or lack thereof in eliminating various barriers in offering goods and services across EU borders As expected some of these initiatives have been more controversial than others This implies that some of these initiatives received the most attention from both the critics and the proponents Undoubtedly the DSM initiatives have been extensively analysed and written about by many academicians and experts But as the author correctly hypothesized a bulk of this research had been often too narrow In other words most of the academic and non academic papers that have analysed DSM initiatives focused only on a single initiative the entire paper Sometimes the focus of a paper has been even narrower there are many papers that have focused only on the impact of a particular DSM initiative on a specific variable The author admits the importance and superiority of this type of research However the author opines that it is also important to analyse these initiatives more broadly

Economic Strategy And National Security Patrick DeSouza, 2000-04-14 1998 was filled with economic events that illustrated the changing and complex agenda for American foreign policy in entering the new millenium In this volume former senior members of the Clinton and Bush Administrations and a next generation of private sector voices set forth and analyze the new intersections between economic strategy and national security Emerging markets are considered as well as new threats and new opportunities that are changing our conception of American security This book arises from a two year project by the Council on Foreign Relations one of the world s premier foreign policy think tanks to articulate a Next Generation approach to American foreign policy The volume is intended for those interested in foreign policy and as a supplement to university level courses on international relations and business The financial trade technology and regional and sectoral topics covered by this book are especially timely World financial markets have showed themselves to be increasingly integrated and volatile with the introduction of new information technologies Global markets for goods have showed themselves to be more fragmented and more difficult to free because of populist concerns over labor and environmental protections Meanwhile electronic commerce will change international economic relations Regionally Asia and Russia our post Cold War focus are in collapse Latin America our fastest growing market and prospective 21st century focus

is teetering due to the lack of foreign reserves In addition to these changing dynamics new economic threats such as corruption and information terrorism counter balance new opportunities to influence the world through American know how in technology and venture capital As evidenced most clearly by the October 1998 vote on Fast Track trade authority for the President domestic audiences seem to be fueled more by negative messages brought by economic nationalists than those who seek a more internationalist approach This communications reality is dangerous and requires attention by the new generation of American leaders who will begin their run for the presidency by the time the book reaches the shelves This book begins to outline new concepts political economic and philosophical for American foreign policy in the 21st century In addition it seeks to drive home the need for the American people to better understand our likely engagement in the new world upon which we are embarking
