Discourse And The Translator Hatim:

Discourse and the Translator B. Hatim, Ian Mason, 2014-06-17 *Discourse and the Translator* both incorporates and moves beyond previous studies of translation Its logical and informative approach to the problems of translation ensures that it will be essential for all those who work with languages in contact Incorporating research in sociolinguistics discourse studies pragmatics and semiotics the authors analyse the process and product of translation in their social contexts Through this analysis the book emphasises the importance of the translator as a mediator between cultures *Discourse and the Translator* Basil Hatim, Ian Mason, 1990 *Discourse and the Translator* both incorporates and moves beyond previous studies of translation Its logical and informative approach to the problems of translation ensures that it will be essential for all those who work with languages in contact Incorporating research in sociolinguistics discourse studies pragmatics and semiotics the authors analyse the process and product of translation in their social contexts Through this analysis the book emphasises the importance of the translator as a mediator between cultures *The Translator As Communicator* Basil Hatim, Ian Mason, 2005-08-19 By taking an integrated approach to the practice of translation Hatim and Mason provide a refreshingly unprejudiced contribution to translation theory They argue that the division of the subject into literary and non literary technical and non technical and so on is unhelpful and misleading Instead of dwelling on these differentials the authors focus on what common ground exists between these distinctions The proposed model is presented through a series of case studies each of which has as its focus one particular feature of text constitution while not losing sight of how this contributes to the whole analytic apparatus Topics covered include a comprehensive description of the interpreting process power and ideology in translation discourse errors curriculum design for translator training *A Topical Bibliography of Translation and Interpretation* Sin-wai Chan, 1995 **Evaluation in Translation** Jeremy Munday, 2012-06-14 In this book Jeremy Munday presents advances towards a general theory of evaluation in translator decision making that will be of high importance to translator and interpreter training and to descriptive translation analysis By evaluation the author refers to how a translator's subjective stance manifests itself linguistically in a text In a world where translation and interpreting function as a prism through which opposing personal and political views enter a target culture it is crucial to investigate how such views are processed and sometimes subjectively altered by the translator To this end the book focuses on the translation process rather than the product and strives to identify more precisely those points where the translator is most likely to express judgment or evaluation The translations studied cover a range of languages Arabic Chinese Dutch French German Indonesian Italian Japanese Russian Spanish and American Sign Language accompanied by English glosses to facilitate comprehension by readers This is key reading for researchers and postgraduates studying translation theory within Translation and Interpreting Studies *Communication Across Cultures* Basil Hatim, 1997 While the literature on either contrastive linguistics or discourse analysis has grown immensely in the last twenty years very little of it has ventured into fusing the two

perspectives Bearing in mind that doing discourse analysis without a contrastive base is as incomplete as doing contrastive analysis without a discourse base the specific aim of this book is to argue that translation can add depth and breadth to both contrastive linguistics as well as to discourse analysis Authentic data from both spoken and written English is used throughout to add clarity to theoretical insights gained from the study of discourse processing Each aspect of the model proposed for the analysis of texts is related separately to a problem of language processing and in domains as varied as translation interpreting language teaching etc The global objectives pursued in this volume are the training of future linguists and the sensitization of users of language in general to the realities of discourse
