from the United States and Canada the EU Australia Japan and the Global South The book analyses the controversy over genetic modification of foodcrops developments in agricultural trade policy at the multilateral and regional levels changing national food policy systems and emerging global governance arrangements for the sector Illustrating contemporary policy debates using both theoretical perspectives and empirical evidence this book will appeal to academics researchers and students specialising in political science environmental studies agricultural economics management and food policy The book will also be of interest to government practitioners in agriculture and environment departments as well as international organisations such as the EU FAO and WTO
