Disability and Discourse Analysis Dr Jan Grue, 2015-01-28 Although efforts have been made to integrate disability into the discourse analysis and conversation analysis canon the link between the two fields needs to be strengthened This ground breaking volume contributes to this link by thoroughly applying the analytical vocabulary of discourse analysis to issues that are central to the field of disability studies It strengthens disability studies by supplying case studies of representations and constructions of disability and disabled people in discourse theorizes the role played by language in the social construction of disability and makes disability a more salient topic for discourse analysts

International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonalidization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches
