Disability And The Politics Of Education An International Reader:

Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world s disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches *Inclusive Education, Politics and Policymaking* Anastasia Liasidou, 2012-02-23 Sport Pedagogy Kathleen Armour, 2013-09-27 Sport Pedagogy offers an essential starting point for anyone who cares about sport education and young people It offers invaluable theoretical and practical guidance for studying to become an effective teacher or coach and for anyone who wants to inspire children and young people to engage in and enjoy sport for life The book also focuses on you as a learner in sport prompting you to reflect critically on the ways in which your early learning experiences might affect your ability to diagnose the learning needs of young people with very different needs Sport Pedagogy is about learning in practice It refers both the ways in which children and young people learn and the pedagogical knowledge and skills that teachers and coaches need to support them to learn effectively Sport pedagogy is the study of the place where sport and education come together The study of sport pedagogy has three complex dimensions that interact to form each pedagogical encounter Knowledge in context what is regarded as essential or valuable knowledge to be taught coached or learnt is contingent upon historical social and political contextual factors that define practice Learners and learning at the core of sport pedagogy is expertise in complex learning theories and a deep understanding of diversity and its many impacts on the ways in which young learners can learn Teachers teaching and coaches coaching effective teachers and coaches are lifelong learners who can harness the power of sport for diverse children and young people Gaining knowledge and understanding of the three dimensional concept of sport pedagogy is the first step towards ensuring that the rights of large numbers of children and young people to effective learning experiences in and through sport are not denied The book is

organised into three sections background and context young people as diverse learners the professional responsibility of teachers and coaches Features of each chapter include research extracts comments to summarise key points individual and group learning tasks suggested resources for further reading and reference lists to enable you to follow up points of interest This book provides you with some of the prior knowledge you need to make best use of teaching materials coaching manuals and other resources In so doing you as a teacher or coach will be well placed to offer an effective and professional learning service to children and young people in sport

Ideology and the Politics of (in)exclusion Linda P. Ware, 2005 Ideology and the Politics of In Exclusion provides an international analysis of the politics of research and practice in special education The contributors to this volume establish purposeful connections to the micropolitics of disability identification and the macropolitics of social structure and describe various geographic locales recount multiple historical contexts rely upon differing sources of evidence and as a consequence relate a more complex and richly layered analysis of educational inclusion Ideology and the Politics of In Exclusion breaks away from the prevailing discourse on educational inclusion as that which occurs in a vacuum separate from social inclusion by providing a close analysis of the narrow frameworks historic influence and research tensions that underwrite current special education practice

Becoming a Great Inclusive Educator Scot Danforth,2014 Inclusive education continues to grow in popularity and acceptance in the United States However most teachers general and special educators are poorly prepared to be successful in inclusive classrooms and schools Undoubtedly the challenge to professionals involves the acquisition of new knowledge and skills But inclusion requires far more It calls upon educators to trouble everything they think they know about disability to question their deepest ethical commitments to take up the work of the Disability Rights Movement in the public schools and to leap headlong into the deepest waters of the rich craft tradition of inclusive teaching This book offers educators the guidance and resources to become great inclusive educators by engaging in a powerful process of personal and professional transformation
