*New Directions in Language Learning Psychology* Christina Gkonou, Dietmar Tatzl, Sarah Mercer, 2015-11-27 This book explores potential new directions in the growing field of language learning psychology. The individual chapters cover theoretical and conceptual developments and innovative methodological designs while also exploring practical implications. Language learning psychology is a vibrant field of research that typically involves constructs from social and educational psychology which it considers in terms of their relevance for the domain of language learning. The diverse theoretical and empirical chapters examine a range of familiar and lesser known constructs highlighting the importance of taking into account both learner and teacher psychologies and recognising the complexity, dynamism and situatedness of psychological constructs as well as the value of employing diverse research methodologies. It is hoped that these new directions concerning populations, constructs and theoretical and methodological frameworks will pave the way for innovative future developments in this vibrant field.

**Learning Strategy Instruction in the Language Classroom** Anna Uhl Chamot, Vee Harris, 2019-05-10 This comprehensive collection comprising both theoretical and practical contributions is unique in its focus on language learning strategy instruction (LLSI). The chapters written by leading international experts embrace both sociolinguistic and psycholinguistic perspectives. The issues presented include different models of strategy instruction and how they can be tailored according to context and the learners' age and attainment level. The collection will be an important resource for researchers in the field both for its critical perspectives and its guidance on collaborating with teachers to design interventions to implement strategy instruction. It also identifies key areas for research including the teaching of less studied groups of strategies such as grammar and affective strategies. The book will prove equally valuable to language teachers through the provision of detailed teaching materials and tasks. Those engaged in professional development whether pre or in service teacher education will find a wealth of concrete ideas for sessions, courses and assignments.

Emotions in Second Language Teaching Juan de Dios Martínez Agudo, 2018-03-12 This edited volume explores the multifaceted nature of teacher emotions presenting current research from different approaches and perspectives focused towards the second language classroom. Twenty three chapters by well known scholars from the applied linguistics, TESOL and educational psychology fields provide the reader with a holistic picture of teacher emotions making this collection a significant contribution to the field of second language teaching. Given the emotional nature of teaching the book explores a number of key issues or dimensions of L2 teachers' emotions that were until now rarely considered. The contributions present the views of a select group of applied linguistic researchers and L2 teacher educators from around the world. This international perspective makes the book essential reading for both L2 teachers and teacher educators.
