Discipline Based Science Education Research A Scientists Guide:

Discipline-Based Education Research Stephanie Slater, Timothy Slater, Inge Heyer, Janelle Bailey, 2015-07-16 This expanded and updated second edition book is written for scientists who want to learn more about how science education research is done and how to get started in discipline based education research It provides the reader with an introduction to the philosophical and practical differences between more familiar traditional scientific research and the more unfamiliar domain of sociological research Readers will learn about the most robust ideas in education research which serve as jumping off points in their new forays into the realm of discipline based education research Quantitative interpretive and action research methods are introduced with real life easy to follow examples The authors long time contributors to the science education community provide rubber meets the road guidance to both first time and experienced researchers to get projects off the ground with the goals of improving classroom practice and contributing to the knowledge base on the teaching and learning of science Discipline based education research is much like traditional scientific research in that using different instruments sometimes results in unexpected answers As an example the cover image uniquely reveals vastly different information about flowers when viewed in visible light upper left and in ultraviolet light lower right In much the same way carefully planned and well executed discipline based education research using a variety of research lenses has the ability to yield unexpected insight into teaching and learning that can benefit all of us Discipline-Based Education Research Stephanie Slater, J.M. Bailey, 2011-01-05 A comprehensive introduction that covers both the theory and practice of science education research This text provides guidance on establishing projects and helps both first time and experienced researchers improve classroom practice It also examines the differences between traditional scientific research and sociological research *Discipline-based Education Research* Stephanie J. Slater, 2010 **STEM Education: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2014-12-31 This reference brings together an impressive array of research on the development of Science Technology Engineering and Mathematics curricula at all educational levels Provided by publisher Research on Teaching Astronomy in the Planetarium Timothy F. Slater, Coty B. Tatge, 2017-08-10 From a noted specialist in astronomy education and outreach this Brief provides an overview of the most influential discipline based science education research literature now guiding contemporary astronomy teaching In recent years systematic studies of effective and efficient teaching strategies have provided a solid foundation for enhancing college level students learning in astronomy Teaching astronomy and planetary science at the college level was once best characterized as professor centered information download lectures Today astronomy faculty are striving to drastically improve the learning environment by using innovative teaching approaches Uniquely the authors have organized this book around strands of commonly employed astronomy teaching strategies to help readers professors and scholars quickly access the most relevant work while simultaneously avoiding the highly specialized technical vocabulary of

constructivist educational pedagogies unfamiliar to most astronomy professors For readers who are currently teaching astronomy at the college level or those who plan on teaching at the college level in the future this Brief provides an indispensable guide

Technologies in Biomedical and Life Sciences Education Harry J. Witchel, Michael W. Lee, 2022-06-24 This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content including media as a learning supplement in comparison to traditional face to face learning Each chapter includes research on and a broad brush summary of approaches to combining life sciences education with educational technologies The chapters are organized into four main sections each of which focuses on a key question regarding the consequences of incorporating

media into education In this regard the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity Further they address the ongoing discussion as to whether students need to be present for lectures and on how having agency in their own learning can improve both retention and conceptual understanding To link the content to current events the authors also shed light on the impact that the COVID 19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies Consequently the book offers life science educators valuable guidance on the technologies already available and an outlook on what is yet to come
