analytical tools including the discourse space model and in a fresh chapter advocates development of tools from neuroscience. The book begins by exploring some fundamental questions concerning the relationship between language and politics, putting forward the idea that society, language and politics are closely intertwined. There cannot be any politics as we know it without language. The following chapters focus on key aspects of language in relation to political institutions, practices and ideologies, the interaction between speakers and hearers, the projection of different world views and the arousal of political emotions. The final chapters are devoted to historical examples of perennial political issues: racism, international conflict and the role of religion.
