The Social Psychology of Group Cohesiveness Michael A. Hogg,1992 A tour de force As a comprehensive review it stands out as a unique resource not matched by any recent treatment of the group literature Marilyn Brewer Professor of Psychology University of California Los Angeles This advanced level textbook analyzes how social psychology conceptualizes group cohesiveness and solidarity Since 1950 the dominant perspective on this topic has been exposed through the concept

of group cohesiveness a concept tied to interpersonal processes among small interactive aggregates of people Although repeatedly challenged this perspective still thrives In the first part of the book Michael Hogg describes in detail the origins and nature of this concept showing precisely how it has been modified simplified and ultimately reduced to personal attraction A critique of reductionism in social psychology frames his central argument that problems with the group cohesiveness concept are due to its reduction of group processes to interpersonal processes This critique sets the scene for the second part of the book which presents an alternative positive conceptualization of group cohesiveness and solidarity This new perspective centers on social and self categorization theories and presents current research in detail Hogg uses new conceptual and methodological developments in social psychology to present an account of group cohesiveness more sophisticated and more complete than those based on a traditional understanding The book ends with an examination of implications for our understanding of phenomena such as groupthink social loafing and group performance *Language Matters* Christopher N. Candlin, Sik Hung Ng, Chi-yue Chiu, 2004 This book stresses on the social purpose of language use and its cognitive development It covers a diverse set of topics with many real life illustrations of the interaction of culture identity and communication *Interpreting Qualitative Data* David Silverman, 2006 This text offers practical and sensible advice on the central issues involved in qualitative research from one of the leading researchers The book assesses an unrivalled range of qualitative methods and the strengths of methodologies **Communications**, 2003 **A Sociology of Food and Nutrition** John Germov, Lauren Williams, 2008 A Sociology of Food and Nutrition The Social Appetite is a comprehensive introduction to the social context of food and nutrition Leading international authors analyse the socio cultural political economic and philosophical factors that influence contemporary food production distribution and consumption Back cover The Social Psychological Analysis of Attitudes Towards the European Community Martin Böcker, 1992 Based on a criticism of current attitude theories an approach is presented that focuses on the expression of attitudes Attitudinal discourse is introduced as the act of communication arising from different personal conceptualisations of the attitudinal object Instead of studying attitudes towards objects of limited relevance the European Community was chosen to add to this work the value of an applied study The EC is of a particular relevance in the present period in which it is moving towards an economical and political union The methodology used in this study includes the MDS analysis of mental maps content analysis and discourse analysis and the expectancy value analysis of predictor items Data were collected in the U K in France and in Germany Towards Cyberpsychology Giuseppe Riva (Ph.D.), Carlo Galimberti, 2001
