Walter, 2022-07-22 Outcome based planning and evaluation OBPE with its straightforward approach built on a flexible framework is the perfect model to enable youth services professionals to deliver effective services regardless of uncertainties An outcome based approach can help youth services stay grounded in producing desired outcomes with and for youth through responsive programs services and processes that can adapt to changing conditions Clarifying the relationship between planning program development and evaluation the five simple steps outlined in this book will help youth services staff conduct solid community assessments and integrate OBPE into their work Inside its pages you will learn a short history of OBPE and its evolution why it is crucially important to involve youth in all stages of program development with guidance on navigating challenges how to think about planning as the need to react quickly whether due to natural or human made disasters changing demographics or economic swings the five steps of OBPE from gathering information about your community and determining the outcomes that will serve your community to crafting accurate outcome statements developing an evaluation plan and maximizing the results of successful outcome based programs how to visualize the steps needed to successfully plan implement and evaluate an outcome based program using the template included in the book ways to share your data to let people know the library's important role in the community and additional useful tools to bolster your work including environmental scan forms and ideas for creating relevant family storytimes **Model-based Feedback Control of Cavity**

Resonance Clarence W. Rowley, David R. Williams, 2006 This report presents results of experiments and numerical simulations studying closed loop feedback control of oscillations in the compressible flow past a rectangular cavity When weapons bays are exposed to high flow speeds extremely large pressure fluctuations result and are often large enough to cause structural damage to the aircraft and internal stores The goal of this work is to design and implement a model based feedback controller to suppress oscillations in the flow past a cavity over a range of operating conditions using much less power than open loop techniques and to understand the physics well enough to allow the techniques to be reliably transferred to full scale aircraft Several specific advances have been made in this work relevant for cavity flow control as

well as for other closed loop flow control applications Theoretical models are presented for temporally developing shear layers and cavity oscillations at the flow conditions used in both simulations and experiments These models can be used to construct dynamic observers which reconstruct the full flow information from a limited number of sensors and significantly outperform static estimators such as Linear Stochastic Estimation LSE

How to ideally criticize individual employees and teams in Japan and the USA* ,2021-02-19 Seminar paper from the year 2020 in the subject Leadership and Human Resources Miscellaneous grade 1 3 Aachen University of Applied Sciences language English abstract This paper uses the theoretical foundations of Hofstede s Cultural Dimensions and Meyer s Cultures Map to develop feedback guidelines for a Dutch manager in Japan and a French manager in the USA For this purpose the countries concerned are first classified and compared using Meyer s and Hofstede s cultural classification methods Based on the theoretical foundation feedback guidelines are developed for the respective managers With regard to the Dutch manager in Japan it is particularly evident that he should be careful to use a language that is not too direct and that he needs to adapt to the Japanese high context culture in both speech and behavior The French manager in the USA is advised mainly to use diplomacy and understand flatter hierarchies and greater willingness to take risks In a further step the developed guidelines are compared with feedback rules of the Dutch company Philips and the French company WEKA In both theory and practice great importance is attached to an efficient discussion structure At Philips importance is also attached to a conversation at eye level and the employee s point of view which corresponds with the theoretical findings In the French example less emphasis is placed on preparation which is surprising in terms of the theoretical classification of France Instead a calm and non violent communication is called for which to a certain extent is also addressed in the theoretically based guideline The results of the term paper provide assistance for managers in Japan and the USA However it must be remembered that cultures are a very complex construct and that due to the scope of this term paper it was not possible to include all components Managers are advised to deal intensively with the host country s culture in order to ensure appropriate and efficient interaction with

employees The results also suggest further studies on the topic Thereby additional theoretical approaches as well as experience reports from managers in practice should be included Due to the constantly evolving worldwide cultural diversity insightful findings can be expected *Digital Image Processing* William K.
