Machu Picchu Johan Reinhard, 2007 Machu Picchu recently voted one of the New Wonders of the World is one of the world's most famous archaeological sites yet it remains a mystery Even the most basic questions are still unanswered What was its meaning and why was it built in such a difficult location Renowned explorer Johan Reinhard attempts to answer such elusive questions from the perspectives of sacred landscape and archaeoastronomy Using information gathered from historical archaeological and ethnographical sources Reinhard demonstrates how the site is situated in the center of sacred mountains and associated with a sacred river which is in turn symbolically linked with the sun's passage Taken together these features meant that Machu Picchu formed a cosmological hydrological and sacred geological center for a vast region
