short from a biopsychosocial perspective This has called for research based on frameworks that incorporate both the body and the environment There is a great corpus of knowledge of the functions of a body and a growing corpus of environmental factors such as perceptions among specific groups of persons towards disabilities However there is a lack of knowledge of the perception of disabilities from a general population This book offers an insight into how we can broaden our understanding of disability by using Social Representations Theory with specific examples from studies on hearing loss The authors highlight that attitudes and actions are outcomes of a more fundamental disposition i e social representation towards a phenomenon like disability This book is written assuming the reader has no prior knowledge of Social Representations Theory It will be of interest to all scholars students and professionals working in the fields of disability studies health and social care and sociology

Critical Disability Theory Richard Francis Devlin, Dianne Pothier, 2006 People with disabilities in Canada inhabit a system of deep structural economic social political legal and cultural inequality a regime of dis citizenship Despite the widespread belief that Canada is a country of liberty equality and inclusiveness many persons with disabilities experience social exclusion and marginalization They are socially constructed as second class citizens Conventional understandings of disability are dependent on assumptions that characterize disability as misfortune and by implication privilege the normal over the abnormal Consequently it is presumed that societal organization based upon able bodied and minded norms is inevitable and that the best we can do is show sympathy or pity The essays Critical Disability Theory contend instead that achieving equality for the disabled is not fundamentally a question of medicine or health nor is it an issue of sensitivity or compassion Rather it is a question of politics and of power and powerlessness This book argues that we need new ways to think about the nature of disability a new understanding of participatory citizenship that encompasses the disabled new policies to respond to their needs and a new vision of their entitlements Twenty four scholars from a variety of disciplines come together here to identify the problems with traditional approaches to disability and to provide new directions The essays range from focused empirical

and experiential studies of different disabilities to policy analyses legal interrogations and philosophical reconsiderations The result will be of interest to policy makers professionals academics non governmental organizations and grassroots activists

Disability, Human Rights and Education Felicity Armstrong, Len Barton,1999 This volume recognizes the importance of an informed cross cultural understanding of the policies and practices of different societies within the field of disability human rights and education It represents an attempt to critically engage with issues arising from the historical and contemporary domination of portrayals of the western as advanced democratic and exemplary in contrast to the construction of the rest of the world as backward primitive and inferior in these fundamental areas How human rights are understood in different contexts is a key theme in this book Some contributors raise questions about the value of a human rights model across all societies Others see the struggle for human rights as at the heart of the struggle for an inclusive society The implications for education arising from this debate are identified and a series of questions are raised by each author for further reflection and discussion as well as providing a stimulus for developing future research
