What a wonderful resource! Doody's Medical Reviews. The 4th Edition is unique in recognizing the rapid changes in both the causes of crises and the latest attempts to provide timely multidisciplinary approaches to the practice of this growing specialty. Evident throughout this edition is the call to identify crisis leadership among the increasingly talented base of nurses who have responsibility to move the profession to recognize and accept that they can be advocates for better planning, coordination, education, and training. Frederick M. Burkle Jr., MD, MPH, DTM, PhD, Hon. FAAP, FACEP, Senior Fellow, Scientist, Harvard Humanitarian Initiative, Harvard University, T.C. Chan School of Public Health. From the Foreword: This impressive edition builds upon the solid foundation of the first three award-winning editions with an expanded focus on climate change-related disasters, globalization, and its implications for emerging and re-emerging infectious diseases; the accommodation of high-risk, high-vulnerability populations; and the potential for disaster arising from a world witnessing increasing community violence and civil unrest. Patricia M. Davidson, PhD, MED, RN, FAAN, Professor, Dean, Johns Hopkins School of Nursing. From the Foreword: The contributing authors read like a Who's Who of disaster leaders. They lend their special expertise and insights, which are supported and elucidated by cogent learning strategies in the use of case studies.
