Disasters And The Media Global Crises And The Media:

Disasters and the Media Mervi Pantti, Karin Wahl-Jorgensen, Simon Cottle, 2012 This book offers unique insights into how news media today make disasters culturally meaningful and politically important drawing on cutting edge theoretical work and recent examples It looks at how globalization is affecting the meanings of disaster but also considers the continued relevance of nations and their citizens as interpretive frameworks *Global Crisis Reporting* Cottle, Simon, 2008-11-01 From climate change to the global war on terror from forced migration to humanitarian disasters these are just some of the global crises addressed in this accessible ground breaking book For the first time the author examines how why and to what extent these are diverse threats to humanity conveyed in today s news media **Climate Change and the Media** Tammy Boyce, Justin Lewis, 2009 It is now more than a quarter of a century since the Intergovernmental Panel on Climate Change published their first comprehensive report on the dangers posed by anthropogenic global warming Over the last twenty five years the weight of evidence about the causes and consequences of climate change has become compelling The solutions are fairly simple we must switch to more sustainable and efficient forms of energy production And yet they remain elusive globally we produce significantly more greenhouse gases now than we did back in 1990 The sad truth is that this inaction has made climate change inevitable the only question that remains is whether we can prevent it spiraling out of control How do we explain this colossal global failure The problem is political rather than scientific we know the risks and we know how to address them but we lack the political will to do so The media are pivotal in this equation they have the power to set the public and the political agenda *Climate Change and the Media Volume 2* gathers contributions from a range of international scholars to explore the media s role in our understanding of the problem and our willingness to take action Combined these chapters explain how and why media coverage has to date fallen short in communicating both the science and the politics of climate change They also offer guidance about how the media might shift from being the problem to becoming part of the solution Publisher s website [Reporting Humanitarian Disasters in a Social Media Age](#) Glenda Cooper, 2018-10-26 From the tsunami to Hurricane Sandy the Nepal earthquake to Syrian refugees defining images and accounts of humanitarian crises are now often created not by journalists but by ordinary citizens using Twitter Facebook YouTube Instagram and Snapchat But how has the use of this content and the way it is spread by social media altered the rituals around disaster reporting the close if not symbiotic relationship between journalists and aid agencies and the kind of crises that are covered Drawing on more than 100 in depth interviews with journalists and aid agency press officers participant observations at the Guardian BBC and Save the Children UK as well as the ordinary people who created the words and pictures that framed these disasters this book reveals how humanitarian disasters are covered in the 21st century and the potential consequences for those who posted a tweet a video or photo without ever realising how far it would go **Disasters and the Mass Media**, 1980 **World Disasters Report 2006** Jonathan Walter, 2006 Which people are missing out on humanitarian aid because

no journalists report on them no donors are interested in them no agencies have assessed their needs or because their governments ignore them This year's report ventures into the shadows lying behind the more publicized disasters of 2005 2006 It combines first hand reporting from the field with critical analysis of aid flows and donor preferences to highlight places and issues starved of attention The report calls on aid organizations journalists governments and academics to work together to address the symptoms and causes of neglected humanitarian crises *Terror Post 9/11 and the Media* David L. Altheide, 2009 Throughout the world the mass media are responsible for shaping the form and content of experiences In this book David L Altheide examines how the mass media including news and popular culture have cast terrorism propaganda and social control post 9 11 Altheide shows how fear works with terrorism to alter discourse social meanings and our sense of being in the world Emphasis is placed on the different institutional interventions and how these particular stories become framed and inform the wider media narratives of terror The author argues that post 9 11 we are witnessing the emergence of new communication formats that not only constitute counter narratives but also shape future communicative experience The text is suitable for scholars and students interested in the ongoing relationship between the media and terror post 9 11

Global Television and the Shaping of World Politics Royce J. Ammon, 2001-08-31 Ammon studies the historic interconnectedness between diplomacy and communications how communications have historically determined the practice of diplomacy and how communications can determine diplomatic outcomes under certain conditions **International Journal of Mass Emergencies and Disasters**, 1986 The Media and Disasters Joan Deppa, 1993 On a bitter December night in 1988 Pan Am Flight 103 the Maid of the Seas flying from Frankfurt to New York exploded over Lockerbie Scotland killing 270 people Among the victims were citizens from over 21 countries 11 villagers and 35 Syracuse University students returning home from studying abroad The bombing set in motion a drama of epic proportions played out on television screens and newspaper pages around the world Scenes from the tragedy etched themselves on the public consciousness a screaming mother at Kennedy Airport collapsing upon learning of the fate of her child flames engulfing the modest homes of Lockerbie weeping Syracuse University students in mourning at a basketball game the mangled cockpit of the jumbo jet resting in an idyllic Scottish meadow Behind these scenes another drama unfolded Hundreds of journalists swarmed to the traumatized village In New York scores of reporters photographers and cameramen rushed to the airport to record the reactions of bereaved family members All over the country people watched the names of the dead scrolling across their televisions many praying for those presumed to be on board The disaster also engulfed institutions many unprepared to mediate between the public's need for information and the need for privacy by those most affected In engrossing detail *The Media and Disasters* chronicles the story behind the headlines illustrating how the media and the people it encountered in pursuit of the news experienced and affected the journalistic process The book addresses in narrative fashion the universal themes common to most tragedies emphasizing the increasingly powerful role of the media and its agents in representing

such catastrophes to the world **Disaster Recovery World** ,1998 *Managing Crises* Uriel Rosenthal,Arjen Boin,Louise Kloos Comfort,2001 This textbook considers the phenomenon of crises from a new perspective one that bridges the conventional social science view with the ever changing nature of crises in modern society The textbook is divided into five sections The first section introduces the perspective taken in the textbook and offers an understanding of who crises means The second section discusses how crises develop and escalate One chapter in this section offers case studies of a number of Los Angeles riots that have taken place since the 1960 s including the riot sparked by the verdict of the Rodney King trial The third section provides discussions on the decision making leadership and coordination that occur when responding to any particular crisis Section four reviews the politicization of crisis as well as the traumas that accompany any crisis The fifth section details the unintended consequences of modernization and how this will shape crises of the future *Strategic Communication in Crisis Management* Sally Ray,1999-04-30 Her three stage model of crisis stages provides a comprehensive understanding of the significant factors that affect the success of communicating in crisis situations She shows how strategic communication is best understood and developed from a broad frame of reference and how specific communication choices must emerge from specific situations Corporate communications specialists at all levels in both the private and public sectors plus executives with other management responsibilities will find Dr Planning for Uprooted People in the Midst of Disaster Ranjana Ariaratnam Zook,1999 **Journal of International Affairs** ,2005 The Green Agenda in American Politics Robert J. Duffy,2003 Organizations such as the Sierra Club and Friends of the Earth are familiar to anyone with an interest in environmental protection As activist groups they played by the same rules for years But in 1994 the rules changed With the Republican takeover of Congress environmental groups faced sweeping changes in federal policies that threatened the enforcement of environmental laws As these organizations intensified their efforts to meet these challenges they also altered their electoral strategies and political spending patterns This book traces those actions and shows what they mean for the future of environmentalism in the political arena While environmental advocacy groups have become bigger and better funded in recent years so have the corporate interests that compete with them for the attention of public and politicians The Green Agenda in American Politics offers a new look at environmental advocacy that focuses on contemporary lobbying electioneering and agenda setting in this new context Drawing on interviews with activists from a wide range of organizations Robert Duffy describes what environmental groups actually do when lobbying officials or the public He examines activity at both national and state levels to emphasize their growing use of websites email and action alert networks to conduct more sophisticated grassroots campaigns and he shows how they are devoting more funds to unregulated forms of spending such as independent expenditure issue advocacy advertising and public education campaigns Duffy also tracks emerging trends in interest group politics and provides an overview of activism through the early 1990s He then documents the emergence of more aggressive action after 1994 such as providing campaign services to candidates and

mounting voter registration drives He also shows how state and local groups have begun to play more important roles in the wake of the rollback of federal environmental regulations Brimming with new insights into interest group lobbies in general and contemporary environmental groups in particular Duffy s book opens a new window on the influence of Big Money in the supposedly democratic electoral process **Crisis, Media** ,2004 Contributed articles presented at the Crisis Media Workshop organized by Sarai CSDS Delhi in March 2003 analysing media coverage on wars and internal disturbances in various South Asian countries **World of Work** ,2008-04 Understanding the Media Eoin Devereux,2003-06-04 Introducing the key theoretical issues in media analysis using examples from old and new media this text encourages students to use case studies to examine their own media use and exposure Each chapter contains concise summaries exercises extracts model exam and essay questions and suggestions for further reading Auckland Unplugged Lindy Newlove,Eric Stern,Lina Svedin,2003-03-17 These challenges include finding an appropriate division of responsibility and labor between public and private sector actors crafting and coordinating a crisis response that addresses perceived threats to community values and avoids the twin perils of underreaction e g passivity or paralysis and overreaction e g crying wolf or political grandstanding coping with competence authority discrepancies under stress those who have expert knowledge of the technical issues rarely have the authority to make policy those who have the authority generally lack the technical expertise to comprehend the subtleties and uncertainties of the issues at stake and maintaining credibility and legitimacy when facing acute ill structured problems in politicized publicized and highly uncertain environments BOOK JACKET
