## **Discovering Londons Buildings With Twelve Walks:**

**Discovering London's Buildings** John Bold, Tanis Hinchcliffe, 2009 Discovering London's Buildings is an original highly accessible guide to understanding the city's incredibly diverse architecture. Because of the variety, complexity and sheer number of its structures it's far more difficult to get a sense of how London developed than it is with Rome, Paris or New York. This book uses a selective and thematic approach to look at elements of the architecture and the services provided: domestic, commercial, religious and institutional. There are chapters on houses and apartments as well as on offices, churches and government buildings. Other sections focus on schools and railway stations, shops and pubs, buildings for sport and parks. Extensively illustrated and richly informed, the book celebrates both the masterpieces and the mundane, dating from the Middle Ages to the present day. It culminates in 12 themed architectural walks throughout the city, each carefully planned to explore a diverse range of buildings.

**Approaching Monumentality in Archaeology** James F. Osborne, 2014-10-24 Interdisciplinary study of monumental art and architecture in human history. Monumentality is a human phenomenon that has occurred in nearly all times and places. Because of its ubiquity, monumentality is something that has been studied by a large number of disciplines and individuals. *Approaching Monumentality in Archaeology* explores the phenomenon of monumental art and architecture from humankind's most ancient past to recent history and does so using an interdisciplinary approach that incorporates the research of anthropological archaeologists, art historians, classicists and sociologists working in a wide variety of historical and cultural contexts. The volume seeks to define what is meant by the terms monument and monumentality and to understand the social and political significance of monument building as it has manifested around the world. By advocating for a relational approach to the topic that seeks to find monumentality in the ongoing relationship between object and person, this book offers the opportunity to begin the process of uniting these varied interests into a unified discourse.

**City Tourism** Robert Maitland, Brent W. Ritchie, 2009 Capital city status attracts and drives tourism by enhancing a city's appeal to the tourist and its international standing. With a focus on city tourism themes, this book examines subjects including the identity of a city in a tourism context and practical matters such as promoting the city as a product. By examining tourist activities in national capitals, the book addresses issues in capital city development as tourist destinations with a broad international approach and case studies on major tourist cities.

**Complex City** Jane Manning, Antony Rifkin, Daniel Elsea, Lionel Eid, George Garofalakis, 2020-08-31 Part story, part atlas, this is a study of a city's complexity. The most successful cities, the most interesting and sought after ones, are those with an intrinsic and distinctive character that remain dynamic and relevant. They are complex and contradictory. And that is worth embracing. This is a visual, geographic and narrative journey that explains why London is the way it is today. Using stunning maps and artful imagery, it makes a compelling case for a finer grain understanding of density through a character-based approach to planning. Each character area is broken down, exploring the characteristics and character-based development potential. For those planning and

designing projects this is a reference book for the early stages of a design project and can help to inform site analyses which form the part of most architectural commissions and urban design studies For lovers of maps and London it is a must read

**Cruickshank's London: A Portrait of a City in 13 Walks** Dan Cruickshank, 2019-11-14 The perfect guide to the hidden history of London's streets BBC History Magazine In Cruickshank's London Britain's favourite architectural historian describes thirteen walks through one of the greatest cities on earth From the mysterious Anglo Saxon origins of Hampstead Heath via Christopher Wren's magisterial City churches to the industrial bustle of Victorian Bermondsey each walk explores a crucial moment in our history and reveals how it helped forge the modern city Along the way Cruickshank peppers the book with vivid photographs sketches and maps so you can immediately follow in his footsteps Every street in London contains a story This book invites you to hear them \_\_\_\_ An inspiringly illustrated guide to walks across London It proves how much we

can miss if we don't pay close attention to our surroundings Country Life All power to Cruickshank and his intrepid and knowledgeable kind We need them Times Literary Supplement **Country Life Illustrated**, 2009 A History of Aerial Photography and Archaeology Martyn Barber, 2011 Packed with examples of the photography it describes this accessible book celebrates the role which flight and aerial photography have played in the development of archaeology and the identification and analysis of key sites in Britain Beginning with balloonist adventurers and pioneers of flight it explores the parallel development of military reconnaissance techniques and their usefulness to archaeologists concentrating especially on the era between the two world wars when aerial archaeology really came of age The Official Tourists' picturesque Guide to the London and North Western Railway, and Other Railways with which it is Immediately in Connection. ...
