Assistive Technologies for People with Diverse Abilities Giulio E. Lancioni, Nirbhay N. Singh, 2014-01-07 The familiar image of the disabled tends to emphasize their limitations and reduced quality of life. However, many people with cognitive motor and other difficulties also have the capacity to enhance their social interactions, leisure pursuits, and daily activities with the aid of assistive technology. Assistive devices, from the simple to the sophisticated, have become essential to intervention programs for this population. And not surprisingly, the numbers of devices available are growing steadily. Assistive Technologies for People with Diverse Abilities offers expert analysis of pertinent issues coupled with practical discussion of solutions for effective support. Its comprehensive literature review describes current and emerging devices and presents evidence-based guidelines for matching promising technologies to individuals. Program outcomes are assessed as are their potential impact on the future of the field. In addition, chapters provide detailed descriptions of the personal and social needs of the widest range of individuals with congenital and acquired conditions, including Acquired brain damage, Communication impairment, Attention and learning difficulties with special focus on college students, Visual impairment and blindness, Autism spectrum disorders, Behavioral and occupational disorders, Alzheimer's disease, Severe profound and multiple impairments. The scope and depth of coverage makes Assistive Technologies for People with Diverse Abilities an invaluable resource for researchers, professionals, and graduate students in developmental psychology, rehabilitation medicine, educational technology, occupational therapy, speech pathology, and clinical psychology.

Research and Advanced Technology for Digital Libraries Birte Christensen-Dalsgaard, Donatella Castelli, Bolette Ammitzboell Jurik, Joan Lippincott, 2008-09-15 This book constitutes the refereed proceedings of the 12th European Conference on Research and Advanced Technology for Digital Libraries (ECDL 2008) held in Aarhus, Denmark, in September 2008. The 28 revised full papers and 10 revised short papers presented together with 1 panel description, the extended abstracts of 24 revised poster and demo papers were carefully reviewed and selected from a total of 125 submissions. The papers are organized in topical sections on digital preservation, social tagging, quotations and annotations, user studies, and system evaluation, from content-centric to person-centric systems, citation analysis, collection building, user interfaces, and personalization, interoperability, information retrieval, and metadata generation.
