2004 Logistics Demensions vol1 , Dods High-risk Areas United States Government Accountability Office,2017-09-19 Military operations in Iraq and Afghanistan have focused attention on the Department of Defense s DOD supply chain management The supply chain can be critical to determining outcomes on the battlefield and the investment of resources in DOD s supply chain is substantial In 2005 with the encouragement of the Office of Management and Budget OMB DOD prepared an improvement plan to address some of the systemic weaknesses in supply chain management GAO was asked to monitor implementation of the plan and DOD s progress toward improving supply chain management GAO reviewed 1 the integration of supply chain management with broader defense business transformation and strategic logistics planning efforts and 2 the extent DOD is able to demonstrate progress In addition GAO developed a baseline of prior supply chain management recommendations GAO surveyed supply chain related reports issued since October 2001 identified common themes and determined the status of the recommendations Exploring GAO's High-risk List and Opportunities for Reform United States. Congress. House.

Committee on Oversight and Government Reform,2013 **DOD's High-Risk Areas. Progress Made Implementing Supply Chain Management Recommendations, But Full Extent of Improvement Unknown** ,2007 DOD s success in improving supply chain management is closely linked with its overall defense business transformation efforts and completion of a comprehensive integrated logistics strategy Our prior reviews and recommendations have addressed business management problems that adversely affect the economy efficiency and effectiveness of DOD s operations and that have resulted in a lack of adequate accountability across several of DOD s major business areas We have concluded that progress in DOD s overall approach to business transformation identified as a high risk area in 2005 is needed to confront other high risk areas including supply chain management We have made a number of recommendations to address defense business transformation including strengthening the management of DOD s business systems modernization through the adoption of enterprise architecture and investment management best practices In response DOD has taken several actions intended to advance transformation such as establishing governance structures like the Business Transformation Agency and developing an Enterprise Transition Plan aligned with its business enterprise architecture As a separate effort DOD has been developing a strategy to guide logistics programs and initiatives across the department Called the To Be logistics roadmap this strategy would identify the scope of logistics problems and capability gaps to be addressed and include specific performance goals programs milestones resources and metrics to guide improvements in supply chain management and other areas of DOD

logistics DOD has not established a target date for completing the To Be logistics roadmap According to DOD officials its completion is pending the results of the department s ongoing test of new concepts for managing logistics capabilities Initial results of this test are expected to be available in the spring of 2007 *Defense Acquisition Guidebook* Management Concepts, Incorporated,2006 **Vision Working Group Report and Scenarios** Sheila R. Ronis,2010 The Project on National Security Reform submitted its 2 year study of the national security system Forging a New Shield to the President President elect and Congress on November 26 2008 Before the Project finalized the report s recommendations its Vision Working Group tested the findings against a diverse set of scenarios to determine if the recommendations were robust and effective This volume documents the scenario testing process used by the Vision Working Group and includes the actual pre reform and post reform scenarios and details many other scenario techniques used in the overall study Results revealed that each of the five major findings improved the performance of the current national security system but on the whole the findings concluded that the national security system was at risk of failure and needed serious reform The work of the Vision Working Group has led to the formulation of an additional recommendation The country must establish a mechanism to infuse greater foresight into the Executive Branch and in particular the national security system This proposed mechanism named the Center for Strategic Analysis and Assessment would exist and operate within the Executive Office of the President This volume details the proposed architecture and operation of the Center **DOD's HIGH-RISK ARES: Efforts to Improve Supply Chain Can Be Enhanced by Linkage to Outcomes, Progress in Transforming Business Operations, and Reexamination of Logistics Governance and Strategy** ,2007 The most recent update to the plan shows that DOD has made progress developing and implementing its supply chain management improvement initiatives but the current performance measures in the plan do not fully demonstrate results DOD is generally staying on track for implementing its initiatives although there have been delays in meeting certain milestones Notwithstanding this overall progress and the commitment of DOD leadership to resolving supply chain problems the long term time frames for many of these initiatives present challenges to the department in sustaining progress toward substantially completing their implementation Moreover the plan lacks outcome focused performance measures that could gauge the results of many of the individual improvement initiatives or demonstrate progress in the three focus areas limiting DOD s ability to fully demonstrate the results achieved through its plan Increasing the plan s focus on measurable outcomes will enable DOD s internal and external stakeholders including Congress and OMB to track the interim and long term success of DOD s initiatives and help DOD determine if it is meeting its goals of achieving more effective and efficient supply chain management In addition our recent work has identified continuing problems related to the three focus areas in DOD s plan In the area of requirements forecasting the military services are experiencing difficulties estimating the length of time between the initiation of a procurement action and the receipt of spare parts into the supply system for equipment and weapon systems We also found continuing problems

in the Air Force's inventory management practices hindering its ability to efficiently and effectively maintain its spare parts inventory for military equipment. Specifically, an average of 52 percent of the Air Force's secondary on order inventory was not needed to support on order requirements.

Integrating the Department of Defense Supply Chain Eric Peltz, Marc Robbins, Geoffrey McGovern, 2012. The authors provide a framework for an integrated Department of Defense DoD supply chain, associated policy recommendations, and a companion framework for management practices that will drive people to take actions aligned with this integrated supply chain approach. Building on the framework and policy recommendations, they identify opportunities to improve DoD supply chain efficiency and highlight several already being pursued by DoD.

DOD's High-risk Areas United States Government Accountability Office, 2017-09-16. The availability of spare parts and other critical items provided through the Department of Defense's DOD supply chains affects the readiness and capabilities of U.S. military forces. Since 1990, GAO has designated DOD supply chain management as a high-risk area. In 2005, DOD developed a plan aimed at addressing supply chain problems and having GAO remove this high-risk designation. DOD's plan focuses on three areas: requirements forecasting, asset visibility, and materiel distribution. GAO was asked to provide its views on: 1) DOD's progress in developing and implementing the initiatives in its plan; 2) the results of recent work relating to the three focus areas covered by the plan; and 3) the integration of supply chain management with efforts to improve defense business operations. GAO also addressed broader issues of logistics governance and strategic planning. This testimony is based on prior GAO reports and analysis. To determine whether to retain the high-risk designation
