Enterprise Interoperability Enterprise Interoperability:

Enterprise Interoperability V Raúl Poler, Guy Doumeingts, Bernhard Katzy, Ricardo Chalmeta, 2012-02-24 Within a scenario of globalised markets where the capacity to efficiently cooperate with other firms starts to become essential in order to remain in the market in an economically socially and environmentally cost effective manner it can be seen how the most innovative enterprises are beginning to redesign their business model to become interoperable This goal of interoperability is essential not only from the perspective of the individual enterprise but also in the new business structures that are now emerging such as supply chains virtual enterprises interconnected organisations or extended enterprises as well as in mergers and acquisitions Composed of over 40 papers Enterprise Interoperability V ranges from academic research through case studies to industrial and administrative experience of interoperability The international nature of the authorship continues to broaden Many of the papers have examples and illustrations calculated to deepen understanding and generate new ideas The I ESA 12 Conference from which this book is drawn was organized by Polytechnic University of Valencia on behalf INTERVAL and the European Virtual Laboratory for Enterprise Interoperability INTEROP VLab and sponsored by the International Federation for Information Processing IFIP and the International Federation of Automatic Control IFAC A concise reference to the state of the art in systems interoperability Enterprise Interoperability V will be of great value to engineers and computer scientists working in manufacturing and other process industries and to software engineers and electronic and manufacturing engineers working in the academic environment Enterprise Interoperability: Smart Services and Business Impact of Enterprise Interoperability Martin Zelm, Frank-Walter Jaekel, Guy Doumeingts, Martin Wollschlaeger, 2018-10-25 The ability of future industry to create interactive flexible and always on connections between design manufacturing and supply is an ongoing challenge affecting competitiveness efficiency and resourcing The goal of enterprise interoperability EI research is therefore to address the effectiveness of solutions that will successfully prepare organizations for the advent and uptake of new technologies This volume outlines results and practical concepts from recent and ongoing European research studies in EI and examines the results of research and discussions cultivated at the I ESA 2018 conference Smart services and business impact of enterprise interoperability The conference designed to encourage collaboration between academic inquiry and real world industry applications addressed a number of advanced multidisciplinary topics including Industry 4 0 Big Data the Internet of Things Cloud computing ontology artificial intelligence virtual reality and enterprise modelling for future smart manufacturing Readers will find this book to be a source of invaluable knowledge for enterprise architects in a range of industries and organizations *Enterprise Interoperability* Guy Doumeingts, Jörg Müller, Gérard Morel, Bruno Vallespir, 2007-08-24 Composed of over 50 papers Enterprise Interoperability ranges from academic research through case studies to industrial and administrative experience of interoperability The international nature of the authorship continues to broaden Many of the papers have examples and

illustrations calculated to deepen understanding and generate new ideas This is a concise reference to the state of the art in software interoperability

Enterprise Interoperability IV Keith Popplewell, Jenny Harding, Chalmers Ricardo, Raul Poler, 2010-05-30 Enterprise Interoperability is the ability of an enterprise or organisation to work with other enterprises or organisations without special effort It is now recognised that interoperability of systems and thus sharing of information is not sufficient to ensure common understanding between enterprises Knowledge of information meaning and understanding of how it is to be used must also be shared if decision makers distributed between those enterprises in the network want to act consistently and efficiently Industry's need for Enterprise Interoperability has been one of the significant drivers for research into the Internet of the Future EI research will embrace and extend contributions from the Internet of Things and the Internet of Services and will go on to drive the future needs for Internets of People Processes and Knowledge

Enterprise Interoperability II Ricardo Jardim-Gonçalves, Jörg Müller, Kai Mertins, Martin Zelm, 2007-08-29 Interoperability the ability of a system or a product to work with other systems or products without special effort from the user is a key issue in manufacturing and industrial enterprise generally It is fundamental to the production of goods and services quickly and at low cost at the same time as maintaining levels of quality and customisation Composed of over 90 papers Enterprise Interoperability II ranges from academic research through case studies to industrial and administrative experience of interoperability The international nature of the authorship continues to broaden Many of the papers have examples and illustrations calculated to deepen understanding and generate new ideas A concise reference to the state of the art in software interoperability Enterprise Interoperability II will be of great value to engineers and computer scientists working in manufacturing and other process industries and to software engineers and electronic and manufacturing engineers working in the academic environment

Enterprise Interoperability VI Kai Mertins, Frédérick Bénaben, Raúl Poler, Jean-Paul Bourrières, 2014-02-19 In 2007 INTEROP VLab defined Enterprise Interoperability as the ability of an enterprise system or application to interact with others at a low cost with a flexible approach Enterprise Interoperability VI brings together a peer reviewed selection of over 40 papers ranging from academic research through case studies to industrial and administrative experience of interoperability It shows how in a scenario of globalised markets the capacity to cooperate with other firms efficiently becomes essential in order to remain in the market in an economically socially and environmentally cost effective manner and that the most innovative enterprises are beginning to redesign their business model to become interoperable This goal of interoperability is vital not only from the perspective of the individual enterprise but also in the new business structures that are now emerging such as supply chains virtual enterprises interconnected organisations or extended enterprises as well as in mergers and acquisitions Establishing efficient and relevant collaborative situations requires managing interoperability from a dynamic perspective a relevant and efficient collaboration of organizations might require adaptation to remain in line with potentially changing objectives evolving resources and unexpected events for example Many

of the papers contained in this the seventh volume of Proceedings of the I ESA Conferences have examples and illustrations calculated to deepen understanding and generate new ideas The I ESA 14 Conference is jointly organised by Ecole des Mines Albi Carmaux on behalf of PGSO and the European Virtual Laboratory for Enterprise Interoperability INTEROP VLab and supported by the International Federation for Information Processing IFIP A concise reference to the state of the art in systems interoperability Enterprise Interoperability VI will be of great value to engineers and computer scientists working in manufacturing and other process industries and to software engineers and electronic and manufacturing engineers working in the academic environment

Enterprise Interoperability VIII Keith Popplewell, Klaus-Dieter Thoben, Thomas Knothe, Raúl Poler, 2019-04-25 This book gathers the proceedings of the I ESA 18 Conference which was organised by the Fraunhofer IPK on behalf of the European Virtual Laboratory for Enterprise Interoperability INTEROP VLab and the DFI and was held in Berlin Germany in March 2018 It presents contributions ranging from academic research and case studies to industrial and administrative experiences with interoperability that show how in a globalised market scenario where the ability to cooperate with other organisations efficiently is essential in order to remain economically socially and environmentally cost effective the most innovative digitised and networked enterprises ensure that their systems and applications can interoperate across heterogeneous collaborative networks of independent organisations Furthermore the content addresses smart services and the business impact of enterprise interoperability on organisations Many of the papers in this ninth volume of the I ESA Conference proceedings include examples and illustrations to help deepen readers understanding and generate new ideas Offering a detailed guide to the state of the art in systems interoperability the book will be of great value to all engineers and computer scientists working in manufacturing and other process industries and to software engineers and electronic and manufacturing engineers working in academic settings

Enterprise Interoperability Bernard Archimède, Bruno Vallespir, 2017-07-05 Interoperability of enterprises is one of the main requirements for economical and industrial collaborative networks Enterprise interoperability EI is based on the three domains architectures and platforms ontologies and enterprise modeling This book presents the EI vision of the Grand Sud Ouest pole PGSO of the European International Virtual Laboratory for Enterprise Interoperability INTEROP VLab It includes the limitations concerns and approaches of EI as well as a proposed framework which aims to define and delimit the concept of an EI domain The authors present the basic concepts and principles of decisional interoperability as well as concept and techniques for interoperability measurement The use of these previous concepts in a healthcare ecosystem and in an extended administration is also presented

Enterprise Interoperability Raúl Poler, Marten van Sinderen, Raquel Sanchis, 2009-09-29 This book constitutes the proceedings of the Second IFIP WG 5.8 International Workshop on Enterprise Interoperability IWEI 2009 held in Valencia Spain in October 2009 The 11 contributions included in the volume were carefully reviewed and selected from 25 submissions The papers are representative of the current research activities in the

area of enterprise interoperability They cover a wide range of enterprise interoperability issues from foundational theories frameworks architectures methods and guidelines to project results and case studies Enterprise Interoperability Matthieu Lauras, Martin Zelm, Bernard Archimède, Frédérick Benaben, Guy Doumeignats, 2015-01-05 Enterprises and organizations of any kind embedded in today's economic environment are deeply dependent on their ability to take part in collaborations Consequently it is strongly required for them to get actively involved for their own benefit in emerging potentially opportunistic collaborative enterprise networks The concept of interoperability has been defined by INTEROP VLab as The ability of an enterprise system or application to interact with others at a low cost in a flexible approach Consequently interoperability of organizations appears as a major issue to succeed in building on the fly emerging enterprise networks The International Conference on Interoperability for Enterprise Systems and Applications I ESA 2014 was held under the motto interoperability for agility resilience and plasticity of collaborations on March 26-28 2014 and organized by the Ecole des Mines d'Albi Carmaux France on behalf of the European Laboratory for Enterprise Interoperability INTEROP VLab On March 24-25 co-located with the conference eight workshops and one doctoral symposium were held in four tracks complementing the program of the I ESA 14 conference The workshops and the doctoral symposium address areas of greatest current activity focusing on active discussions among the leading researchers in the area of Enterprise Interoperability This part of the conference helps the community to operate effectively building co-operative and supportive international links as well as providing new knowledge of on-going research to practitioners The workshops and doctoral symposium aimed at exploiting new issues challenges and solutions for Enterprise Interoperability EI and associated domains of innovation such as Smart Industry Internet Of Things Factories of the Future EI Applications and Standardisation These proceedings include the short papers from the I ESA 14 workshops and the doctoral symposium The book is split up into 9 sections one for each workshop and one for the doctoral symposium All sections were organized following four tracks 1 EI and Future Internet Factory of the Future 2 EI Application Domains and IT 3 EI Standards 4 EI Doctoral Symposium For each section a workshop report is provided summarizing the content and the issues discussed during the sessions The goal of the first track was to offer a discussion opportunity on interoperability issues regarding the use of Internet of Things on manufacturing environment Workshops 1 and 3 on one hand and regarding the potential of innovation derived from the use of digital methods architectures and services such as Smart Networks Workshops 2 and 4 on the other hand The second track focused on particular application domains that are looking for innovative solutions to support their strong collaborative needs Thus the track developed one workshop on the use of EI solution for Future City Logistics Workshop 5 and one on the use of EI solutions for Crisis Disaster Management Workshop 6 The third track studied the recent developments in EI standardization Two workshops were dedicated to this issue The first one has proposed to focus on the management of standardization Workshop 8 and the second one has chosen to work on the new knowledge on standardization developments

in the manufacturing service domain Workshop 9 The last track the doctoral symposium presented research results from selected dissertations The session discussed EI knowledge issues notably in terms of gathering through social networks or Internet of Things and of exploitation through innovative decision support systems *Enterprise Interoperability* Martin Zelm, Raquel Sanchis, Raul Poler, Guy Doumeingts, 2012-12-17 In a fast changing world governed by innovative Enterprise Services and the Future Internet the issue of Enterprise Interoperability is no longer limited to the interoperation of systems within a single company but has become a much greater multi view issue of interoperability throughout a Network of Enterprises This book contains the proceedings of 13 workshops presented as short papers and discussions held at each workshop The workshops were co located with the I ESA 12 Conference organized by the Polytechnic University of Valencia Spain Complementary to the conference program the workshops aimed at exploiting new issues challenges and solutions for Enterprise Interoperability The scope of the workshops spanned a wide range of interoperability issues in Service Science and Innovation Model Driven Interoperability Service Oriented Architectures Factories of the Future Enterprise Networks and Management SME Aspects and Standards **Knowledge Sharing in the Integrated Enterprise** Peter Bernus, Mark Fox, 2005-09-20 Enterprise Architects in their endeavor to achieve Enterprise Integration have limited guidance on how best to use Enterprise Models and Modeling Tools to support their practice It is widely recognized that the practice of engineering enterprises needs a number of models but how to maintain the relation between these models with ease is still a problem Model interoperability is an issue on multiple counts How to interchange models between enterprise modeling tools How to maintain the interdependencies between models whether they describe the enterprise on the same level but from different points of view or from the same point of view but on different levels of abstraction and granularity How to maintain a coherent and evolving set of enterprise models in support of continuous change processes How to use and reuse enterprise models as a knowledge resource The answers to these questions are of great importance to anyone who is implementing ISO9001 2000 requirements whether through using enterprise architecture practice or not although it can be argued that a well executed architecture practice should satisfy ISO9001 without additional effort This volume attacks the problem on three fronts 1 Authors working in international standardisation and tool development as well as in enterprise modeling research present the latest developments in semantic integration 2 Authors who are practitioners of or conducting active research in enterprise architecting methodologies give an account on the latest developments and strategic directions in architecture frameworks and methodologies 3 Authors who use or develop information integration infrastructures present best practice and future trends of this aspect of enterprise integration Chapters of this book include contributions to the International Conference on Enterprise Integration and Modelling Technology ICEIMT 04 and those presented at the Design of Information Infrastructure Systems for Manufacturing DIISM 04 Workshop While DIISM is traditionally oriented at supporting manufacturing practice the results have a far greater domain of applicability *Revolutionizing Enterprise*
