G., 2021-02-26 Mathematical Olympiads for Beginning Students The Zeroth Book for Elementary Schoolers is an initiative that arises at the suggestion of parents and teachers to want to count on a practical study material for the training of future Math Olympians who currently have nascent math skills This workbook covers a complete training program for beginners in five volumes where each volume corresponds to a specific level of difficulty and is especially aimed at elementary school children between 6 and 11 years old with little or no experience in Math Olympiads who seek to strengthen their math skills and become a Math Olympian It may even be of great help for beginners in math for whom it may be their first workbook on the subject This volume includes the first level of the training program which consists of a set of 10 exams where each exam consists of 8 problems inspired by problems from Math Olympiads around the world This workbook has been carefully designed so that the student can solve each of the problems in the same book without having to resort to additional sheets thus having a complete and orderly record of all problems already solved At the end of the book the student will find the answers to all the problems proposed in this volume It is worth mentioning that this series of workbooks is a sequential preparation material that is anyone who begins with this training program is recommended to start from the first volume without skipping any of them in this way the students will experience the gradual improvement of their math skills evidencing their progress

continuously Likewise students are suggested to carry out the following training scheme between 6 and 7 years old up to volume 2 between 7 and 8 years up to volume 3 between 8 and 9 years old up to volume 4 between 9 and 11 years old up to volume 5 It is important to clarify that what is suggested above is only referential as it is the minimum required for those ages however students are always encouraged to continually overcome themselves and face increasingly higher levels of difficulty For the success of this training program the essential presence of a guide tutor or parent is recommended during the learning process of the student so that they can be guided in the face of doubts and encouraged in the face of obstacles that may arise So students are encouraged to start their training as soon as possible and become a successful contestant in Math Olympiads and parents are encouraged to ensure and closely monitor the proper preparation of their children
