Nawy, 2005 Now updated to reflect the latest ACI 318 05 Building Code this cutting edge book analyzes the design of reinforced concrete members through a unique and practical step by step trial and adjustment procedure Supplements narrative with flow charts to guide readers logically through the learning process Provides ample photographs of instructional testing of concrete members to decrease the need for actual laboratory testing Uses Strain Limits Design Method in all design examples as mandated in the new code using the new load factors and strength reduction factors Updates chapter on seismic design of buildings to comply with the major changes to the ACI 318 Code and the new International Building Code provisions on seismic design Adds chapter on the LRFD design of bridge deck structures in accordance with AASHTO 2002 including a summary of the various pertinent load and design provisions and equations Offers an expanded section on the strut and tie modeling for the design of reinforced

concrete deep beams A useful construction reference for engineers **PCI Journal** ,1996 **Prestressed Concrete**
Edward G. Nawy,2006 Completely revised to reflect the new ACI 318 05 Building Code and International Building Code IBC
2000 and its 2002 modifications this popular book offers a unique approach to examining the design of prestressed concrete
members in a logical step by step trial and adjustment procedure Integrates handy flow charts to help readers better
understand the steps needed for design and analysis Includes a revised chapter containing the latest ACI and AASHTO
Provisions on the design of post tensioned beam end anchorage blocks using the strut and tie approach in conformity with
ACI 318 05 Code Offers a new complete section with two extensive design examples using the strut and tie approach for the
design of corbels and deep beams Features an addition to the elastic method of design with comprehensive design examples
on LRFD and Standard AASHTO designs of bridge deck members for flexure shear and torsion conforming to the latest
AASHTO 2003 specifications Includes a revised chapter on slender columns including a simplified load contour biaxial
bending method which is easier to apply in design using moments rather than loads in the reciprocal approach A useful
