Semiotic Margins Shoshana Dreyfus, Susan Hood, Maree Stenglin, 2010-12-16

Semiotic Margins analyses the meaning making potential of not only language but modalities like laughter music colour and architectural spaces By examining resources often positioned on the side line of mainstream semiotic accounts this study raises the question of what counts as part of language and communication and why Beginning with the more established nonverbal resources of communication four major themes of modalities of meaning are covered The investigation of music and space looks at how semiotic systems in classical music interact Using children s books the relationship between images and verbal meaning is then explored presenting implications for student literacy as well as a methodology for supporting children excluded from mainstream literary practices Finally new approaches to transcribing representations in screen based technologies are presented through an examination of television advertisements Semiotic Margins will appeal to linguists and semioticians wishing to pursue research in systemic functional linguistics and multimodal discourse analysis

Discourse and Practice Theo van Leeuwen, 2008-05-01

Adding a new introduction and two previously unpublished papers Discourse and Practice New Tools for Critical Discourse Analysis brings together van Leeuwen s methodological work on discourse analysis of the last 15 years Discourse van Leeuwen argues is a resource for representation a knowledge about some aspect of reality which can be drawn upon when that aspect of reality has to be represented a framework for making sense of things And they are plural There can be different discourses different ways of making sense of the same aspect of reality that serve different interests and will therefore be used in different social contexts However abstract some discourses are discourses ultimately always represent doings van Leeuwen argues Doing is

the foundation of knowing and social practices are the foundation of discourses Studying children s books newspaper reports brochures and other texts as well as photographs and children s toys van Leeuwen investigates what can happen when practices are transformed into discourses and provides analytical tools for reconstructing discourses from texts Throughout the book van Leeuwen makes connections between sociological and linguistic or semiotic concepts and methods to ensure the social and critical relevance of his analytical categories van Leeuwen s work has already been widely used by critical discourse analysts across the world This volume will be a welcome guide for anyone looking for a form of discourse analysis that is both explicit and methodical and critically incisive
