*Sacred Reality, Digital Simulation* Enrico Beltramini,2025-07-29 This study explores the relationship between the sacred and the virtual emphasizing the sacred as a divinely dependent consecrated space activated through ritual mediating between the profane and the holy The central argument is that the virtual is fundamentally incompatible with the ritual form a concept developed by Romano Guardini and others including Joseph Ratzinger which holds that the sacred is not merely acknowledged but made present through ritualized actions that require tangible participatory engagement Even if the virtual realm were acknowledged as real and retained both the bodily presence of the faithful and the Divine Presence the rite would still be ineffective Virtuality prevents the proper enactment of the rite rendering it ineffective At its core the ritual form is performative embodied and consecratory It requires physical presence material elements and a structured sequence of gestures symbols and words that together make the divine encounter possible Their absence in virtual spaces disrupts ritual form compromising its sacramental function

Gunkel, 2007 Thinking Otherwise is a unique and revealing look at the philosophical dimensions of information and communication technology ICT Among thinkers the importance of what transpires within the virtual world is the effect these activities have on real human beings who exist outside of and beyond the computer generated virtual environment Obviously the result of ICT interactions can lead to good or bad outcomes Gunkel however is not concerned about deciding which argument is more compelling but how these arguments are organised articulated and configured This approach entails challenging criticizing and even changing the terms and conditions of the discourse itself For example the binary nature of computer logic tends to colour debate about subsequent issues by

portraying each side as the antithesis of the other That is the switch is turned on or off Thinking Otherwise investigates the unique quandaries complications and possibilities introduced by a form of otherness that veils through technology the identity of the Other Therefore Gunkel formulates alternative ways of proceeding to take into account additional forms of otherness Gunkel submits traditional forms of philosophical reasoning to a critical reevaluation caused by opportunities made available with information technology and also develops alternative ways of thinking that are oriented otherwise
