Classification, Data Analysis, and Knowledge Organization Hans Hermann Bock, Peter Ihm, 1991-02-05 Studies in Classification, Data Analysis, and Knowledge Organization, Interdisciplinary Knowledge Organization Rick Szostak, Claudio Gnoli, María López-Huertas, 2016-03-24 This book proposes a novel approach to classification discusses its myriad advantages and outlines how such an approach to classification can best be pursued It encourages a collaborative effort toward the detailed development of such a classification This book is motivated by the increased importance of interdisciplinary scholarship in the academy and the widely perceived shortcomings of existing knowledge organization schemes in serving interdisciplinary scholarship It is designed for scholars of classification research knowledge organization the digital environment and interdisciplinarity itself The approach recommended blends a general classification with domain specific classification practices The book reaches a set of very strong conclusions Existing classification systems serve interdisciplinary research and teaching poorly A novel approach to classification grounded in the phenomena studied rather than disciplines would serve interdisciplinary scholarship much better It would also have advantages for disciplinary scholarship The productivity of scholarship would thus be increased This novel approach is entirely feasible Various concerns that might be raised can each be addressed The broad outlines of what a new classification would look like are developed This new approach might serve as a complement to or a substitute for existing classification systems Domain analysis can and should be employed in the pursuit of a general classification This will be particularly important with respect to interdisciplinary domains Though the impetus for this novel approach comes from interdisciplinarity it is also better suited to the needs of the Semantic Web and a digital environment more generally Though the primary focus of the book is on classification systems most chapters also address how the analysis could be extended to thesauri and ontologies The

possibility of a universal thesaurus is explored The classification proposed has many of the advantages sought in ontologies for the Semantic Web The book is therefore of interest to scholars working in these areas as well *Classification, Data Analysis, and Knowledge Organization Models and Methods with Applications* Gesellschaft für Klassifikation.

Jahrestagung, Hans Hermann Bock, Peter Ihm, 1991 *Classification and Knowledge Organization* Rüdiger Klar, Otto Opitz, 2013-03-14 Large collections of data and information necessitate adequate methods for their analysis The book presents such methods proposes and discusses recent approaches and implementations and describes a series of practical applications **From Data to Knowledge** Wolfgang Gaul, Gesellschaft für Klassifikation. Jahrestagung, 1996 The subject of this book is the incorporation and integration of mathematical and statistical techniques and information science topics into the field of classification data analysis and knowledge organization Readers will find survey papers as well as research papers and reports on newest results The papers are a combination of theoretical issues and applications in special fields Spatial Data Analysis Economics Medicine Biology and Linguistics **Classification Made Simple** Eric J. Hunter, 2009 This established textbook introduces the essentials of classification as used for information processing The third edition takes account of developments that have taken place since the second edition was published in 2002 Classification Made Simple provides a useful gateway to more advanced works and the study of specific schemes As an introductory text it will be invaluable to students of information work and to anyone inside or outside the information profession who needs to understand the manner in which classification can be utilized to facilitate and enhance organisation and retrieval
