Handbook of Homework Assignments in Psychotherapy Nikolaos Kazantzis, Luciano L'Abate, 2006-12-11 The aim of this Handbook of Homework Assignments in Psychotherapy Research Practice and Prevention is to provide comprehensive resource on the role of homework assignments in psychotherapy and prevention. However, the process of generalizing in-session therapeutic work through between-session activity has a long history in psychotherapy. This Handbook is designed to elucidate and extend that history by presenting theoretical and clinically focused descriptions of the role of homework assignments in a range of psychotherapies, clinical populations, and presenting problems. Designed for both the beginning and the experienced psychotherapy practitioner, this Handbook assumes a basic knowledge of psychopathology and practice of psychotherapy and prevention. The Handbook aims to contribute to the professional resources for all psychotherapy practitioners and researchers in private and public practice, graduate students in clinical and counseling psychology, couples and family therapists, as well as residents in psychiatry. This book does not aim to review the theories of psychotherapy in detail, specific treatments of psychopathology, clinical assessment, or basic psychotherapy and prevention processes that are currently available in numerous psychotherapy textbooks. This Handbook is a clinical resource designed to provide a focused coverage of how to integrate homework assignments into psychotherapy practice and in the prevention of mental illness. Outline for the Handbook: This Handbook comprises four distinct parts: **Current Issues in Clinical**

Psychology Gill Edwards, 2012-12-06 Since 1980 clinical psychologists and other professionals have gathered in Merseyside each year for the Annual Merseyside Course in Clinical Psychology. The aim of this annual event is to offer post-qualification training and a forum for discussion in areas of current clinical interest. Over the years, the course has attracted national and international speakers and attendees of the highest calibre, plus up-to-the-minute reports on current research. In August 1984, the course was held for the first time in the beautiful old city of Chester. As always, the papers were presented by leading clinicians and researchers in their respective fields; once again, this included several contributions from Merseyside psychologists. Since 1981, the proceedings of this conference have been published as *Current Issues in Clinical Psychology*. The present volume, Volume 4, covers four major areas of current interest: The Child and Therapy, Rehabilitation Across the Specialties, New Directions for Psychology and the Law, and Addictive Behaviors. Each of these areas must be relevant to the work of almost all clinical psychologists at various times. The volume closely reflects the order and content of papers presented at the 1984 conference, although it also includes one paper by Guliz Elal Lawrence, written specially for this publication. The 1984 conference was widely acknowledged to be another success, both academically and socially, and I hope that this volume fully conveys the interesting and stimulating ideas and information enjoyed by those who attended.
